# REPORT.

During the quarter ending 31st March 1907, there were registered in Scotland the births of 31,508 living children, the deaths of 22,635 persons, and 7268 marriages. The births are 367 fewer than in the previous quarter, and 1468 fewer than in the corresponding quarter of last year; the deaths are 3283 more than in the previous quarter, and 2147 more than in the corresponding quarter of last year; the marriages are 1278 fewer than in the previous quarter, and 34 fewer than in the corresponding quarter of last year. Compared with the average number of births, deaths, and marriages registered during the first quarter of the last ten years, the averages being corrected for the increase of population, the births are 2515 fewer, the deaths 596 fewer, and the marriages 450 fewer.

TABLE I.—BIRTHS, DEATHS, and MARRIAGES in SCOTLAND, its Groups of Districts and Divisions during the Quarter ending 31st March 1907, with their Proportion to the Population; also the Illegitimate Births, and their Proportion to the Total Births.

## BIRTHS.

The total number of births registered during the quarter was 31,508, for which the equivalent annual birth-rate is 26·8 per thousand of the estimated population of Scotland. This rate is the same as that for the previous quarter, but is 1·5 less than that of the first quarter of last year, and 2·1 less than the mean of the rates of the first quarter of the last ten years. It is the lowest birth-rate of the first quarter recorded for Scotland since compulsory registration was fairly established.

In the Large Town registration districts, the birth-rate of the quarter was 29·8; in the Small Town districts, 27·6; in the Principal Town districts, 26·9; in the Mainland-Rural districts, 24·4; and in the Insular-Rural districts, 19·7.

With the exception of that of the Insular-Rural group of registration districts, the birth-rate of each of the groups is lower than the corresponding rate of the first quarter of last year.

In the divisions of the counties the birth-rate ranged from 29·6 in the South-Western, to 19·9 in the Northern. In the West-Midland it was 27·8; in the North-Eastern, 26·4; in the East-Midland, 24·7; in the South-Eastern, 24·1; in the Southern, 21·7; and in the North-Western, 20·9.

In the eight principal towns the birth-rate of the quarter ranged from 30·1 in Greenock, to 21·7 in Edinburgh. In Glasgow it was 27·8; in Dundee, 27·3; in Aberdeen, 27·0; in Paisley, 26·6; in Leith, 26·4; and in Perth, 21·9. In each of these towns the birth-rate was smaller than it was in the first quarter of last year.

Of the 31,508 births registered during the quarter, 2168, or 6·9 per cent., were illegitimate. These births are 29 more than in the previous quarter, but 36 fewer than in the corresponding quarter of last year. The illegitimate rate is 0·2 higher than that of the previous quarter, and the same amount

higher than that of the corresponding quarter of last year. The illegitimate rate of the quarter was highest in the Mainland-Rural districts, 8·8, and lowest in the Large Town districts, 5·8. In the Principal Town districts it was 6·9; in the Insular-Rural districts, 6·9; and in the Small Town districts, 5·9. In the divisions of the counties this rate ranged from 12·6 in the North-Eastern, to 5·3 in the West-Midland. In the Southern it was 11·0; in the South-Eastern, 7·2; in the East-Midland, 7·0; in the North-Western, 6·9; in the Northern, 6·8; and in the South-Western, 5·6. In the counties this rate ranged from 16·0 in Elgin, 12·9 in Aberdeen, and 12·7 in Kirkcudbright and in Wigtown, to 2·5 in Ross and Cromarty, 3·2 in Sutherland, 4·2 in Dumbarton, in Renfrew, and in Shetland, and 4·5 in Stirling. In ten counties this rate exceeded 10 per cent.; in seventeen counties it was between 5 and 10 per cent.; in six counties it was less than 5 per cent.

Of the living children registered, 16,170 were males, and 15,338 females. Thus to each 100 female children born there were 105·4 male children.

The average number of births registered daily in January was 357, in February 348, and in March 345. This average of January is 13 less than that

of the previous January, that of February 27 less than that of the previous February, and that of March 26 less than that of the previous March.

The birth-rate in England and Wales for the quarter was 26·7, which is 0·1 lower than that of Scotland.

#### DEATHS.

Deaths registered in Scotland during the quarter numbered 22,635; the equivalent annual death-rate is 19·2 per thousand. This death-rate is 2·9 higher than that of the previous quarter, 1·6 higher than that of the first quarter of last year, but is 0·5 lower than the mean of the death-rates of the first quarter of the last ten years.

In the groups of registration districts the death-rate ranged from 19·9 in the Insular-Rural Districts, and 19·8 in the Large Town districts, to 18·2 in the Small Town districts. In the Principal Town districts it was 19·5, and in the Mainland-Rural districts, 19·1. In each of these groups of registration districts the death-rate was higher in this than in the first quarter of last year.

In the divisions of the counties the death-rate ranged from 23·5 in the Southern, to 18·6 in the North-Eastern. In the Northern it was 20·8; in the North-Western, 20·3; in the East-Midland, 19·4; in the South-Western, 19·0; in the West-Midland, 18·9; and in the South-Eastern, 18·8.

In the eight principal towns the death-rate ranged from 21·4 in Glasgow, to 18·6 in Greenock. In Dundee, it was 20·5; in Paisley, 20·4; in Leith, 19·8; in Perth, 19·7; in Edinburgh, 19·3; and in Aberdeen, 19·1. In Dundee and Greenock the death-rate of the quarter was less than that of the first quarter of last year; in the remainder of the eight towns the death-rate was higher than in that quarter.

Of the total deaths registered during the quarter, 11,065 were of males, and 11,570 of females.

The average number of deaths registered daily in January was 254; in February, 262; and in March, 239. This average of January is 24 more than that of the previous January; that of February 37 more than that of the previous February; and that of March 12 more than that of the previous March.

The death-rate of the quarter in England and Wales was 18·7, which is 0·5 lower than that of Scotland.

#### MARRIAGES.

Marriages registered during the quarter in Scotland numbered 7268, for which the equivalent annual marriage-rate is 6·2 per thousand. This rate is 1·0 lower than that of the previous quarter, 0·1 lower than that of the corresponding quarter of the previous year, and 0·3 lower than the mean of the marriage-rates of the first quarter of the last ten years.

The marriage-rate in the groups of registration districts ranged from 7·0 in the Principal Town districts, to 4·2 in the Mainland-Rural districts. In the Large Town districts it was 6·7; in the Small Town districts, 6·1; and in the Insular-Rural districts, 4·5.

In the divisions of the counties this rate ranged from 6·7 in the South-Western, to 4·7 in the Northern. In the East-Midland it was 6·3; in the South-

Eastern, 6·0; in the West-Midland, 5·6; in the Southern, 5·5; in the North-Western, 5·2; and in the North-Eastern, 5·2.

In the eight principal towns the marriage-rate of the quarter ranged from 8·3 in Paisley to 4·9 in Leith. In Perth it was 7·7; in Glasgow, 7·4; in Dundee, 7·2; in Aberdeen, 6·9; in Edinburgh, 6·8; and in Greenock, 5·8.

The average number of marriages registered daily in January was 117; in February, 63; and in March, 61. The daily average registered in January is 5 fewer than in the previous January; that of February the same as in the previous February; but that of March, 4 more than in the previous March.

TABLE IV.—Births, Deaths, and Marriages, and their Proportion to the Population, in Eight of the Principal Towns of Scotland, during the Quarter ending 31st March 1907.

#### CAUSES OF DEATH IN EIGHT OF THE PRINCIPAL TOWNS.

As nearly 38 per cent. of the population of Scotland live in eight of the principal towns, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, it may be assumed that the causes of death found in them to be prevalent during the quarter are a fairly good indication of the causes of death prevalent generally in the country during the quarter. Similar information regarding the remaining deaths registered during the period in Scotland is not yet available.

The estimated population of these eight towns is 1,812,171. Deaths registered in them during the quarter numbered 9130, for which the equivalent annual death-rate is 20·4. The death-rate of these towns in January was 20·6; in February, 21·1; and in March, 19·6. The average number of deaths registered daily in January was 102; in February, 105; and in March, 97.

Deaths from the acutely infectious diseases numbered 968; of them, 258 were registered in January, 323 in February, and 387 in March. The death-rate of the quarter from these causes amounted to 2·17; that of January was 1·68; of February, 2·33; and that of March, 2·52. The death-rate of this quarter from these causes was 1·00 higher than that of the previous quarter, and 0·78 higher than that of the corresponding quarter of last year. These deaths include 393 from cerebro-spinal meningitis; 330 from hooping-cough; 99 from diphtheria; 76 from measles; 46 from enteric fever; 23 from scarlet fever; and 1 from typhus fever. The equivalent annual death-rate per 100,000 from cerebro-spinal

meningitis amounted to 88 ; from hooping-cough, 74 ; from diphtheria, 22 ; from measles, 17 ; from enteric fever, 10 ; and from scarlet fever, 5. Deaths from enteric fever registered during the quarter are 2 fewer than in the previous quarter, those from measles 15 fewer, and those from scarlet fever 25 fewer ; but those from diphtheria are 5 more, from hooping-cough 151 more, and from cerebro-spinal meningitis 328 more. Of the 393 deaths from cerebro-spinal meningitis, 312 were registered in Glasgow, 37 in Edinburgh, 5 in Dundee, 14 in Paisley, 23 in Leith, and 2 in Greenock ; 74 of them were registered in January, 140 in February, and 179 in March.

Deaths from diarrhoeas numbered 196, for which the equivalent annual death-rate is 44 per 100,000, a rate which is 43 lower than that of the previous quarter. Deaths from these diseases in January numbered 86, in February 49, and in March 61.

Deaths from tuberculous diseases numbered 1166, the equivalent annual death-rate being 261 per 100,000. These deaths are 186 more than in the previous quarter, and 131 more than in the first quarter of last year. Of these 1166 deaths from tubercle, 743 were ascribed to phthisis, a number which is 136 more than in the previous quarter, and 40 more than in the first quarter of last year. The death-rate from phthisis for the quarter was 166 per 100,000.

Deaths ascribed to malignant disease numbered 444; the equivalent annual death-rate amounting to 99 per 100,000 ; these deaths are 34 fewer than in the previous quarter, but 11 more than in the corresponding quarter of last year. Of these deaths, 233 were ascribed to carcinoma, 32 to sarcoma, and 179 to cancer not otherwise defined.

Deaths from pneumonia numbered 1006, the equivalent annual death-rate being 225 per 100,000. Of these deaths 342 were registered in January, 323 in February, and 341 in March. The death-rate of the quarter from pneumonia is 31 higher than that of the previous quarter, and 35 higher than that of the first quarter of last year. Deaths from bronchitis numbered 887, the equivalent annual death-rate being 199 per 100,000, a rate which is 66 higher than that of the previous quarter, and 24 higher than that of the corresponding quarter of last year. Of the deaths from bronchitis registered during the quarter, 332 were registered in January, 312 in February, and 243 in March.

Deaths from diseases and accidents of pregnancy and child-birth, including puerperal septic conditions, numbered 67 : these are 15 fewer than in the previous quarter, and 7 fewer than in the corresponding quarter of last year.

Deaths of children of less than one year old numbered 1680. The births registered during the quarter numbered 11,766 : thus the infantile mortality-rate per thousand births was 143, a rate which is 12 lower than that of the previous quarter, but 14 higher than that of the first quarter of last year. The infantile mortality-rate of the quarter was highest in Aberdeen, 160, and lowest in Greenock, 112. In Paisley it was 151 ; in Glasgow, 146 ; in Leith, 145 ; in Edinburgh, 142 ; in Dundee, 124 ; and in Perth, 122. Compared with the infantile mortality-rates of these towns in the first quarter of last year, those of Dundee and Greenock are lower, while those of the remaining six towns are higher.

Of the total deaths registered in these towns during the quarter, 2945, or 32·2 per cent., were of children of less than five years old ; while 2543, or 27·9 per cent., were of persons of over sixty. The former are 125 more than in the previous quarter, and 288 more than in the first quarter of last year ; the latter are 387 more than in the previous quarter, and 311 more than in the first quarter of last year.

Deaths from violent causes numbered 343 ; they are 7 more than in the previous quarter, and 28 more than in the corresponding quarter of last year. Of these deaths, 2 were homicidal, 29 suicidal, and 312 accidental. Of the accidental deaths, 79 were by burns and scalds, 28 by drowning, 22 by overlying, 30 by suffocation otherwise, 17 by poisons and poisonous vapours, 14 by vehicles and horses, 6 by falls, 2 by weather agencies, 1 each by building operations and machinery, and 112 by other accidents.

#### WEATHER.

The remarks immediately following on the weather of the quarter are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports, and refer more particularly to observations made in the above eight principal towns :—

January was characterised by an exceptionally high mean pressure ; a slightly high mean temperature, with a mean daily range all but the average ; a low mean rainfall ; a large excess of winds from W. and N.W. February was characterised by an average mean pressure ; a low mean temperature, with a high mean daily range ; a rather low mean rainfall ; an excess of winds from S.W., and also from N.W. and N. March was characterised by a high mean pressure ; a high mean temperature, with a large mean daily range ; a rather high mean rainfall ; a large excess of winds from S.W. and W.

Observations made throughout Scotland show that the mean height of the barometric column, reduced to sea-level and 32° Fahr., was 30·131 inches in January, 29·844 inches in February, and 29·951 inches in March. The mean temperature for the quarter was 39°·0, or 0°·6 above the average mean temperature for the corresponding quarter of the last ten years. The mean temperature in January was 38°·2 ; in February, 36°·6 ; and in March, 42°·1. The absolutely highest temperature recorded in January was 56°·0 ; in February, 60°·0 ; and in March, 69°·0. The absolutely lowest temperature recorded in January was 9°·4 ; in February, 5°·0 ; and in March, 10°·0. Rain fell on 16 days in January, on 15 days in February, and on 17 days in March ; the mean amount collected was 2·88 inches in January, 3·09 inches in February, and 3·48 inches in March. Winds from easterly, westerly, northerly, and southerly directions were reported as follows, observations being made twice daily :—Easterly, 6 times in January, 5 times in February, and 5 times in March ; westerly, 43 times in January, 36 times in February, and 44 times in March ; northerly, 16 times in January, 18 times in February, and 13 times in March ; southerly, 21 times in January, 19 times in February, and 23 times in March.

N.B.—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk "\*" is prefixed to those Districts which have different names in the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 45.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING  
TABLES BY AN ASTERISK (\*).

No.	Districts.	Component Parts (Parishes).
<b>2. Orkney.</b>		
13	Birsay .. ..	Part of Harray and Birsay.
14	Deerness .. ..	Part of St Andrews and Deerness.
18	Harray .. ..	Part of Harray and Birsay.
22	North Ronaldshay .. ..	Part of Cross and Burness.
25	St Andrews .. ..	Part of St Andrews and Deerness.
26	Sanday .. ..	Lady, and part of Cross and Burness.
<b>3. Caithness.</b>		
37b	Keiss .. ..	Parts of Canisbay and Wick.
<b>5. Ross and Cromarty.</b>		
58	Applecross .. ..	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch .. ..	Parts of Contin and Urray.
86b	Carloway .. ..	Parts of Barvas and Uig.
87	Lochs .. ..	Lochs and part of Uig.
<b>6. Inverness.</b>		
92b	Cannich .. ..	Parts of Kilmorack and Kiltarlity.
112	Kilmuir .. ..	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
<b>8. Elgin.</b>		
135	Elgin .. ..	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
<b>9. Banff.</b>		
152	Enzie .. ..	Parts of Bellie and Rathven.
155b	Glenrannes .. ..	Parts of Aberlour and Mortlach.
167	Seafeld .. ..	Parts of Cullen and Rathven.
<b>10. Aberdeen.</b>		
171b	Ardallie .. ..	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmonth .. ..	Parts of Crimond, Longside, Lomnay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone and part of Glenmuick.
222b	Millbex .. ..	Parts of Fyvie and Monquhiltter.
227b	New Pitsligo .. ..	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter .. ..	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch .. ..	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells .. ..	Parts of Auchterless and Fergie.
<b>11. Kincardine.</b>		
266	Nigg .. ..	Nigg, and part of Aberdeen.
<b>12. Forfar.</b>		
282	Dundee .. ..	Dundee Combination and part of Mains and Strathmartine.
294b	Kilry .. ..	Parts of Glenisla and Lintrathen.
<b>13. Perth.</b>		
324	Aberfeldy .. ..	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven .. ..	Parts of Auchtergaven and Logiealmond.
331	Balquhadder .. ..	Balquhadder, and part of Comrie.
344	Dowally .. ..	Part of Dunkeld and Dowally.
349	Dunkeld .. ..	Part of Dunkeld and Dowally.
355b	Foss .. ..	Parts of Blair-Athol and Dull.
361	Killin .. ..	Parts of Kenmore and Killin.
375	Logiealmond .. ..	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle .. ..	Meigle, and part of Coupar-Angus.
386b	Persie .. ..	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth .. ..	Perth, and part of Kinnoull.
393b	Stanley .. ..	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan .. ..	Part of Killin.
394c	Tenandry .. ..	Parts of Blair-Athol and Moulin.
<b>14. Fife.</b>		
402	Anstruther-Easter .. ..	Anstruther-Easter, and part of Kilrenny.
417	Crail .. ..	Part of Crail and May Island.
423	Dunbog .. ..	Dunbog, and part of Flisk.
425	Dunino .. ..	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall	Part of Kirkcaldy and Dysart.
457b	Thornton .. ..	Part of Kirkcaldy and Dysart and of Markinch.
<b>17. Stirling.</b>		
473	Bonnybridge .. ..	Parts of Denny, Dunipace, and Falkirk.
483	St Ninians .. ..	Parts of St Ninians and Stirling.
490	Stirling .. ..	Parts of St Ninians and Stirling.

CONSTITUTION OF THE DISTRICTS—*continued.*

No.	Districts.	Component Parts (Parishes).
<b>18. Dumbarton.</b>		
496	Dumbarton .. .. .	Dumbarton, and parts of Cardross and Old Kilpatrick.
<b>19. Argyll.</b>		
504	Ardochattan .. .. .	Part of Ardochattan and Muckalrn.
505	Ardnamurchan .. .. .	(1) Parts of Ardnamurchan, and of Arisalg and Moidart.
506	Ballachulsh, etc. .. .. .	Parts of Kilmallie and Ardgour.
509	Cumlodden and Minard .. .. .	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan .. .. .	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc. .. .. .	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishall; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie .. .. .	Parts of Kilmallie and Ardgour.
525	Lismore .. .. .	Lismore and Appin, and part of Ardgour.
526	Lochgilphead .. .. .	Parts of Glassary and South Knapdale.
529	Muckalrn .. .. .	Parts of Ardochattan and Muckalrn, and Glenorchy and Inishall.
535	Tarbert .. .. .	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow) .. .. .	Part of Kilarrow and Kilmeny.
543	Kilmeny .. .. .	Part of Kilarrow and Kilmeny.
545	Kinlochspelve .. .. .	Part of Pennygown and Torosay.
547	Portnahaven .. .. .	Part of Kilchoman.
548	Salen .. .. .	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory .. .. .	Part of Kilninian and Kilmore.
550	Torosay .. .. .	Part of Pennygown and Torosay.
<b>20. Bute.</b>		
556	Lochranza .. .. .	Parts of Kilbride and Kilmory.
<b>21. Renfrew.</b>		
559b	Bridge of Weir .. .. .	Part of Houston and Killellan and of Kilbarchan.
572	Neilston .. .. .	(1) Part of Neilston; (2) Remainder of Neilston and part of Paisley.
<b>22. Ayr.</b>		
576	Ardrossan .. .. .	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
578(3)	Alloway .. .. .	Parts of Ayr and Maybole.
584b	Crosshill .. .. .	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine .. .. .	Irvine, and part of Dundonald.
603	Loudoun (Darvel) .. .. .	Parts of Loudoun and Galston.
610b	Patna .. .. .	Parts of Dalmellington, Dalrymple, Kirkmichael, and Straiton.
<b>23. Lanark.</b>		
622	Barony .. .. .	Part of Glasgow.
626a	Cadder (Eastern district) .. .. .	Parts of Cadder and Glasgow.
626b	Calderhead .. .. .	Parts of Cambusnethan and Shotts.
644	Glasgow .. .. .	Parts of Glasgow, Govan Combination, and Rutherglen.
<b>25. Edinburgh.</b>		
695b	New Craighall .. .. .	Parts of Inveresk and Liberton.
698b	Stobhill .. .. .	Parts of Borthwick, Cockpen, and Newbattle.
<b>29. Selkirk.</b>		
774a	Caddonfoot .. .. .	Caddonfoot, and part of Innerleithen.
<b>30. Roxburgh.</b>		
787b	Edgerston .. .. .	Parts of Jedburgh and Southdean.
<b>31. Dumfries.</b>		
818b	Brydekirk .. .. .	Parts of Annan, Cummertrees, and Hoddum.
830	Holywood .. .. .	Holywood, and part of Terregles.
853b	Wanlockhead .. .. .	Part of Sanquhar.
<b>32. Kirkcudbright.</b>		
857b	Bargrennan .. .. .	Parts of Minnigaff and Penninghame.
862	Corsockbridge .. .. .	Parts of Balmaclellan, Kirkpatrick-Durham, and Parton.
864	Dalbeattie .. .. .	Part of Crr.
<b>33. Wigtown.</b>		
899	Stranraer .. .. .	Stranraer, and parts of Inch and Leswalt.

# METEOROLOGICAL REPORT

FOR THE MONTHS OF

JANUARY, FEBRUARY, MARCH,

1907.

# NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY FOR THE QUARTER ENDING 31st MARCH 1907.

By Dr BUCHAN, under the Direction of the Council of the Scottish Meteorological Society.

THESE returns are founded on the observations made, morning and evening, at 60 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33' N. ; MEAN LONGITUDE = 3° 45' W.; AND MEAN ELEVATION = 279 Feet.

\* Returns for the individual stations having Sunshine Recorders are given on p. 62.

And when these returns are compared with the averages of 1856–1905, during the same months, they show the following characteristics and differences :—

## JANUARY 1907—

Mean Barometric Pressure, 30·131 inches ; greater than the average of 1856–1905 by 0·328 inch.

Mean Temperature, 38°·2 ; greater by 0°·9.

Mean Daily Range of Temperature, 9°·5 ; greater by 0°·3.

Mean Humidity, 84 per cent. ; less by 3 per cent.

Rain, Number of Days, 16 ; less by 1 day.

Rain, Depth in Inches, 2·88 ; less by 0·96 inch.

Wind, Mean Force (on Scale of 0–12), 2·9 ; being the average.

Wind, Direction of : a 6 days' excess of winds from W. and N.W.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 6·5 ; less by 0·2.

## FEBRUARY 1907—

Mean Barometric Pressure, 29·844 inches ; less than the average of 1856–1905 by 0·002 inch.

Mean Temperature, 36°·6 ; less by 1°·6.

Mean Daily Range of Temperature, 11°·6 ; greater by 1°·4.

Mean Humidity, 86 per cent. ; less by 1 per cent.

Rain, Number of Days, 15 ; being the average.

Rain, Depth in Inches, 3·09 ; greater by 0·02 inch.

Wind, Mean Force (on Scale of 0–12), 3·0 ; greater by 0·1.

Wind, Direction of : a 5 days' excess of winds from between W. and N.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 6·0 ; less by 0·5.

## MARCH 1907—

Mean Barometric Pressure, 29·951 inches; greater than the average of 1856–1905 by 0·142 inch.

Mean Temperature, 42°·1; greater by 1°·5.

Mean Daily Range of Temperature, 14°·1; greater by 2°·0.

Mean Humidity, 83 per cent.; less by 2 per cent.

Rain, Number of Days, 17; greater by 1 day.

Rain, Depth in Inches, 3·48; greater by 0·57 inch.

Wind, Mean Force (on Scale of 0–12), 2·8; less by 0·1.

Wind, Direction of: a 7 days' excess of winds from a Westerly quarter.

Hours of Sunshine, *v. p.* 62.

Mean Amount of Cloud, 5·8; less by 0·5.

## JANUARY 1907—

Hence the month of JANUARY 1907 was characterised by an exceptionally high mean pressure; a slightly high mean temperature, with a fractionally high mean daily range; a low mean humidity; a low mean rainfall, with about the average number of days with rain; a large excess of winds from W. and N.W.

The mean barometric pressure of 30·131 inches was as much as 0·328 inch above the normal, and has been exceeded during the last fifty years only in 1880 and 1896. A deep depression skirted the North of Scotland on 1st and 2nd, and pressure was again low on 28th and 29th. But from 6th to 26th conditions were markedly anticyclonic, and on the morning of the 23rd pressure was above 31 inches over a large part of the country. A reading of 31·06 inches at Aberdeen has been exceeded there only by one of 31·11 inches on January 31st, 1902.

The mean temperature was 38°·2, or 0°·9 above the normal, the days being 1°·0 and the nights 0°·7 above their respective averages. Many stations practically agreed with their normals, but the month embraced a wide range of temperature conditions. On 1st the severe cold of the closing days of December had disappeared, except towards the North-East, Dundee and Aberdeen registering their minima on that day. Thereafter the month fell into two sharply contrasted periods, extremely mild weather prevailing until 21st, with a wintry spell during the last ten days of the month. In the Edinburgh district the mean temperature of the week ending on 26th was no less than 10° below that of the week ending on 12th. Highest temperatures fell, as a rule, between 5th and 7th, or between 12th and 15th, and lowest on 24th, 26th or 31st. The extremes were 56°·0 at Clathick on 15th, and 9°·4 at Kingussie on 31st.

The mean rainfall was 2·88 inches, or 25 per cent. below the normal. There was a decided excess in Shetland, Orkney, and the Northern part of the Mainland, amounting to 54 per cent. at Dunrobin and 33 per cent. at Glencarron. But in most districts there was a well-marked shortage. Eastern districts from Montrose Southwards, and also Dumfriesshire, had less than half their average rainfalls. In the North-West Highlands rain fell on every day from 1st to 16th, with very heavy falls from 11th to 14th. From 16th to 25th there was a dry spell in most districts, followed by several wet days. In Midlothian, East Lothian, and the Border Counties, only nominal amounts were registered between 6th and 25th. Of heavy falls we may note:—at Dunrobin, 1·06 inch on 2nd; at Glencarron, 1·96 inch on 11th, 2·21 inches on 13th and 1·64 inch on 27th; and at Lochbuie, 1·50 inch on 1st and 1·20 inch on 3rd.

The weather was rather stormy, especially in the North, from 1st to 3rd, and gales were general between 27th and 30th.

Some snow or sleet fell early in the month, whilst the last ten days were of a wintry character, with a rather severe snowstorm on 29th.

On 28th a sharp thunderstorm travelled from N.W. to S.E., being noted at Glencarron at 10·45 a.m.; at Fort-William at 11·20 a.m., at Rothesay at noon, and at Edinburgh at 0·54 p.m.

Bright sunshine differed but little from the normal.

Auroras observed in Shetland on 8th, 12th, 14th, and 15th.

## FEBRUARY 1907—

Hence the month of FEBRUARY 1907 was characterised by an average mean pressure; a low mean temperature, with a rather high mean daily range; a mean humidity about the average; an average mean rainfall; a large excess of winds from between W. and N.

The mean pressure was 29·844 inches, being practically the normal. Pressure was high at the beginning and end of the month, the only important disturbance occurring on 19th and 20th, when a very deep depression crossed the North of Scotland. Range was large, the extremes at Leith being 30·587 inches on 5th and 28·530 inches on 19th.

The mean temperature was 36°·6, or 1°·6 below the normal, the days being 0°·9 and the nights 2°·3 below their respective averages. Temperature was lower than in January, clear skies promoting terrestrial radiation and causing low night readings. But though the month was almost continuously cold, extremely low temperatures were, as a

rule, not recorded. The temperature defect was well marked in all districts, but especially in the Border counties. Highest temperatures fell at some stations around 15th, but at most between 25th and 27th; lowest temperatures on 1st, but here and there between 4th and 6th, at Glencarron and Lairg on 14th, and in Orkney and Shetland on 22nd. Ground frosts were unusually frequent, occurring at Crathes on 26 days, and at Balmoral on 24. The extreme shade readings were 60°·0 at Crathes on 25th and 5°·0 at Balmoral on 1st.

The mean rainfall was 3·09 inches, being practically the normal. A general excess in North and West was balanced by a defect in East and South. Thus Lairg and Fort Augustus had amounts more than 40 per cent. above the normal, whilst Dundee and Kelso had shortages of 50 per cent. The greater part of the month's rain fell between 7th and 11th (Dumfries 1·13 inch on 10th), and between 14th and 20th, some heavy falls occurring in West and North during the latter period. Glenquoich registered about 4½ inches from 15th to 17th, and we may note the following:—at Glencarron, about 1 inch on 14th, 15th and 16th; at Fort Augustus, over 1 inch on 16th and 18th; at Fort William, 1·13 inch on 16th and 1·22 inch on 19th; and at Greenock, 1·23 inch on 16th.

From 19th to 21st severe gales from West and North-West prevailed.

Snow was rather frequent, and snowstorms of considerable severity occurred at times, especially around 12th and 21st.

Thunder in various districts on 15th, 17th or 19th.

Bright sunshine was largely in excess. Edinburgh with 125 hours, or 47 per cent. of the possible amount, was much sunnier than the South of England, *e.g.* Bournemouth, 107 hours.

A brilliant aurora was widely observed on 9th, whilst in Shetland displays were noted on 5th, 8th, 9th, 10th, 13th and 19th.

#### MARCH 1907—

Hence the month of MARCH 1907 was characterised by a high mean pressure; a high mean temperature, with a large mean daily range; a low mean humidity; a rather high mean rainfall; a large excess of Westerly winds.

The mean pressure was 29·951 inches, or 0·142 inch above the normal. On 16th, a deep depression crossed Scotland in a N.N.E. direction, and pressure was very irregular from 12th to 18th. Earlier in the month, from 4th to 9th, Northern districts lay under the influence of depressions moving on an Easterly track beyond our Islands. From 20th onwards anticyclonic conditions prevailed. At Leith the sea-level extremes were 30·476 inches on 11th and 28·963 inches on 16th.

The mean temperature was 42°·1, or 1°·5 above the normal, the days being 2°·5 and the nights 0°·5 above their respective averages. The excess was everywhere well marked, and in most Eastern districts the month was the mildest March since 1893, whilst in the West the month in 1905 was at least as mild. The only occurrence of cold weather lasting more than a day or so was from 8th to 12th, when low temperatures ruled both by day and night. On 9th the shade maximum at Balmoral rose to only 30°, whilst on the night of 11th the exposed minimum registered 27° of frost. Highest temperatures occurred towards the close of the month, when the days were unusually warm, the last week having in some districts a mean temperature as much as 8° above the normal. The shade extremes were 69°·0 at Broomlands on 29th, and 10°·0 at Balmoral on the night of 11th.

The mean rainfall was 3·48 inches, or 19 per cent. above the normal. In West and South, as in the Lothians and Fifeshire, there was a decided excess, amounting to 95 per cent. at Paisley, and to 60 per cent. or over at Poltalloch, Rothesay, Glasgow, and Drumlanrig. Towards North-East there was a shortage of about 30, and towards South-East of about 20 per cent. From 4th to 10th and from 12th to 19th there were very heavy rains in North-West and West, with heavy general falls on 16th. We may note:—at Glencarron, falls of 1 inch or over on 4th, 7th, and 14th; at Glenquoich, 2·20 inches on 8th and falls of more than 1 inch on 5th, 15th, 16th and 18th; at Leadhills, 2·01 inches on 16th. The last ten days of the month were rainless, or all but so, over the greater part of the country.

Snow was general from 8th to 10th, lying to a considerable depth in places. Lighter falls of snow or hail on some later days.

From 8th to 10th and from 16th to 18th the weather was of a stormy character.

Thunder heard at Baltasound on 6th; a thunderstorm at Lairg on 17th.

Bright sunshine was again abundant, the closing days of the month being exceptionally sunny.

Auroras observed in Shetland on 10th, 11th, 21st and 22nd; in Orkney on 9th. Of these displays, that on 21st was noted at various stations as far south as Edinburgh.

## REGISTRARS' NOTES.

---

IN compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

---

### INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

---

*The Figures refer to the Numbers of the Districts in the preceding Tables.*

---

#### I. NORTHERN DIVISION.

##### 1. Shetland.

8. NORTHMAVINE.—Four deaths due to influenza, which has been for some time epidemic in the parish.

##### 3. Caithness.

34. BOWER.—The male and female deaths registered during the quarter number exactly the same as the male and female deaths respectively for the whole of last year. Marriages are again *nil*, owing to parties going to the towns or south, to have the marriage ceremony performed.

41. THURSO.—Of the 20 persons whose deaths were registered, 1 was aged over 90, 4 more over 80, and 3 more over 70 years.

##### 4. Sutherland.

53. LAIRG.—Of the eight deaths, six were of persons aged from 80 to 97 years.

55. ROGART.—Influenza very prevalent during the quarter. The average age of the persons whose deaths were registered is 78·09 years.

---

## II. NORTH-WESTERN DIVISION.

### 5. Ross and Cromarty.

#### *Mainland*

59a. AVOCH.—The birth-rate is the lowest on record for the quarter, while the death-rate is almost double the normal. Whooping-cough has been very prevalent, though to it only one death has been directly attributed. Influenza, pneumonia, and other allied illnesses have also prevailed largely.

76. LOCHCARRON.—Eight of the nine persons whose deaths were registered were aged over 70 years, the oldest being 96.

83. TARBAT.—The four persons whose deaths were registered in March were aged 79, 87, 88, and 93 years respectively.

#### *Insular.*

86b. CARLOWAY.—Deaths are almost double the number for last year. Influenza prevalent.

### 6. Inverness.

#### *Mainland.*

95. DAVIOT AND DUNLIGHTY.—Marriages of persons in the parish are celebrated at Inverness. The average age of the three persons whose deaths were registered was 80 years, one having reached the age of 87.

#### *Insular.*

111 (1). NORTH HARRIS.—Marriages registered during the quarter have exceeded in number those registered during the whole of last year.

## III. NORTH-EASTERN DIVISION.

### 8. Elgin.

133. DYKE.—The death registered in March was that of a woman aged 103 years.

### 9. Banff.

146. ALVAH.—Influenza was prevalent in epidemic form after the advent of the New Year, and the majority of the deaths were due to that cause.

149b. CABRACH.—There have been no marriages in this district for more than a year.

157 (1). INVERAVON.—The total absence of deaths and marriages, while there have been 11 births, during the quarter is very remarkable.

### 10. Aberdeen.

172. AUCHINDOIR AND KEARN.—Three of the ten deaths were of persons aged over 69 years, the oldest being 92.

174. BELHELVIE.—Of the eleven deaths, four were of persons aged from 73 to 85 years.

181. CLUNY.—The death in March was from cerebro-spinal fever.

183 (2). CRATHIE.—Marriages are mostly now celebrated in towns.

201. GLENMUCK.—Three of the six deaths registered during the quarter were of persons aged from 73 to 85 years.

225. NEW DEER.—Measles of a mild type prevalent during February and March, but no case proved fatal. Of the twelve deaths, two were accidental and three of persons in the Combination Poorhouse from other parishes. A very large number of emigrants left the district during the quarter, chiefly for Canada.

226. NEWHILLS.—The prevalence of measles and whooping-cough, to which latter disease the deaths of several children were due, accounts for the increase in the number of deaths recorded during March.

231 (1). EAST PETERCULTER.—Six of the fifteen deaths were of persons whose ages ranged from 75 to 88 years.

243. TARVES.—Nearly half the deaths have been those of children born prematurely.

### 11. Kincardine.

253. BENHOLM.—Three of the four deaths were of persons aged 80 years and upwards.

263. LAURENCEKIRK.—Since 1893 this is the first year during which the first quarter has shown no marriages. For this the scarcity of employment during the period is probably responsible. The average age of the persons whose deaths were registered was 66 years.

## IV. EAST-MIDLAND DIVISION.

### 12. Forfar.

269. ABERLEMNO.—Two of the three deaths are those of very young children.

271. ARBIRLOT.—Eleven of the deaths registered were the result of the railway accident at Elliot Junction.

### 13. Perth.

330. AUCHTERGAVERN.—The four persons whose deaths were registered were aged 70, 74, 78, and 80 years respectively.

340. COLLACE.—Measles very prevalent in February. School closed for a month, but no case proved fatal.

341a. COMRIE.—The average age of six of the persons whose deaths were registered was over 65 years.

350. DUNNING.—Two of the deaths were of persons aged 90 and 91 years respectively.

372. LETHENDY AND KINLOCH.—An epidemic of measles prevailed in the beginning of the year and accounted for one death. This was followed by an epidemic of whooping-cough, which necessitated the closing of the Public School for a month. In no case did it prove fatal.

376. LOGIERAIT.—Of the three illegitimate births recorded in January, two occurred in the Combination Poorhouse, while the third child belonged to the vagrant class.

380. METHVEN.—The average age of the thirteen persons whose deaths were registered was 69 years, the youngest being 24 and the oldest 90 years of age.

387. PERTH.—Of the total deaths sixty-six were of persons aged over 60 years. Of these twenty-one were aged between 70 and 80, thirteen over 80, and one 90 years.

#### 14. Fife.

405. AUCHTERDERRAN.—The death-rate for the quarter has been nearly double the usual rate. The deaths include those of a large number of people well up in years.

408. BALLINGRY.—Of the fourteen deaths registered, two were the result of accidents in the pits, one was caused by asphyxia, and eight were of young children whose ages ranged from 4 weeks to 2½ years.

417. CRAIL.—Of the six deaths registered, two were of persons aged 71 and 89 years respectively.

429. FERRY-PORT-ON-CRAIG.—The number of births for the quarter is the lowest since 1859. Since that time the population has nearly doubled.

448. MONIMAIL.—Of the five deaths, three were of infants, of whom two were twins, and two of women aged 84 and 89 years respectively.

449. MOONZIE.—Whooping-cough very prevalent in the parish during February.

455. SALINE.—Of the five deaths registered, four were of children under 7 years of age.

458b. TULLIALLAN.—Of the seven deaths registered, three were of persons aged 77, 85 and 94 years respectively.

459 (1). WEMYSS.—The number of deaths is the lowest recorded in any corresponding quarter during the past 10 years, though two cases of fatal accident are included.

#### 15. Kinross.

461. FOSSOWAY AND TULLIBOLE.—The seven deaths recorded were those of two infants, and of five old people whose ages ranged from 71 to 94 years.

### V. WEST-MIDLAND DIVISION.

#### 17. Stirling.

475. CAMPSIE.—Of the forty deaths, thirteen were of persons whose usual residence was in other parishes, including ten deaths in Lennox District Fever Hospital.

#### 19. Argyll.

##### *Mainland.*

526. LOCHGILHEAD.—Of the twenty deaths, four were of children under 6 months, and four of persons aged from 81 to 85 years.

##### *Insular.*

537. GIGHA AND CARA.—A severe epidemic of influenza was responsible for the deaths of two young people.

#### 20. Bute.

553 (2). KILBRIDE.—The fact is noteworthy that all the births for the quarter, seven in number, were of males.

### VI. SOUTH-WESTERN DIVISION.

#### 22. Ayr.

578 (3). ALLOWAY.—Of the twenty-three deaths, seventeen were of inmates of Ayr District Asylum. Of the remaining six, the ages of four ranged from 62 to 94 years, the oldest resident in the District being among the number.

595. IRVINE.—The death of a centenarian, aged 102 years, was registered in March. This is probably the greatest age recorded in the Death Registers of this District since 1855.

603 (1). NEWMILNS.—Of the twenty-nine deaths, seven were of children aged under one year, and twelve of persons aged over 60 years.

603 (2). DARVEL.—Of the ten deaths registered, two were of infants, and the ages of the others ranged from 48 to 82 years. Both births and deaths are fewer than in the corresponding quarter of 1906. During the past year, the sanitary conditions of the Burgh have been improved. Considerable emigration has taken place.

613 (2). CATRINE.—Of the twelve deaths all are of females. The ages of four of these average 81 years.

#### 23. Lanark.

633. CARSTAIRS.—The death-rate among children has been very high during the quarter.

659. WANDELL AND LAMINGTON.—The only death was that of a man aged 91 years.

## VII. SOUTH-EASTERN DIVISION.

### 24. Linlithgow.

667. KIRKLISTON.—Marriages registered in Kirkliston are always below the normal. Roman Catholics go to Broxburn, Ratho, or Queensferry to be married, there being no chapel or priest in this parish.

### 25. Edinburgh.

677. COLINTON.—Five of the six illegitimate births, and 71 of the 91 deaths took place in Craiglockhart Poorhouse.

686. FALA AND SOUTRA.—The death registered is that of a woman aged over 80 years.

692 (1). NORTH LEITH.—In March ten deaths were certified as due to epidemic cerebro-spinal meningitis.

701. WEST CALDER.—Eight cases of diphtheria have been removed to hospital, but only one death has taken place.

### 27. Berwick.

723. BUNKLE AND PRESTON.—All the four deaths occurred in the first fortnight of January. The ages of the deceased ranged from 44 to 90 years.

737. ECCLES.—The seven deaths were all of persons aged from 56 to 92 years.

### 28. Peebles.

760. EDDLESTON.—The average age of the four persons whose deaths were recorded during the quarter was 71 years.

767. NEWLANDS.—Outbreak of scarlatina in March. So far there have been no deaths therefrom.

773a. WEST LINTON.—The average age of the four persons (all of whom were males) whose deaths were registered was 79 years.

### 29. Selkirk.

778. SELKIRK.—Of the thirty-six deaths, eighteen were of persons aged upwards of 60 years, and five of infants aged under 9 months.

## VIII. SOUTHERN DIVISION.

### 30. Roxburgh.

793. KELSO.—The deaths include those of two persons each aged 92 years. Excluding two children, the average age at death is over 68 years.

795. LILLIESLEAF.—Chicken-pox has prevailed during March, but all the cases have been of a mild type. The deaths registered were of persons aged 77 and 85 years.

796. LINTON.—Of the six deaths, five were of persons aged over 50 years. The other was a case of drowning.

799 (1). MELROSE.—Of the twenty-seven deaths, ten occurred in the District Asylum, and one in the District Infectious Diseases Hospital.

801. MOREBATTLE.—Five of the six deaths were due to "chest complaints."

### 31. Dumfries.

820. DRYFSDALE.—Of the thirty-one persons whose deaths were registered, twenty-one were over 60 years of age, nineteen of these over 70, seven of these over 80, and two of these over 90 years.

### 32. Kirkcudbright.

862. CORSOCK BRIDGE.—Three of the four deaths registered were of persons aged 71, 75, and 79 years respectively.

865. DALRY.—Whooping cough was the cause of death in four of the eight cases.

868. KELLS.—Of the persons whose deaths were registered, seven were of an average age of 79 years, the oldest being aged 91.

869. KELTON.—Of the twenty-nine persons whose deaths were registered, five were aged between 60 and 70, ten between 70 and 80, eight between 80 and 90, and one was aged 93 years.

873. KIRKMABRECK.—The number of deaths is very much below all previous records, the average number for this quarter being about nine. One of the two deaths was that of a very old man who died from exposure.

878. PARTON.—Four of the five deaths were of persons whose ages ranged from 69 to 81 years.

882. TROQUEER.—Influenza prevalent during the month of January. Two deaths therefrom.

884. URB.—This is the largest number of deaths registered in any quarter for a long time. They are mostly of very old people.

### 33. Wigtown.

893. NEW LUCE.—The only death registered was that of a man aged 81 years.

900. WHITHORN.—Of the nineteen deaths, two were of males and seventeen of females. The average age of fourteen of the deceased was 76 years.

# INDEX TO THE DISTRICTS.

*The Figures refer to the Numbers of the Districts in the preceding Tables of Births, Deaths, and Marriages, these being numbered consecutively from 1 to 901.\**

Abbey, . . . 559	Ardersier, . . . 91	Barrhead and	Bridge of Weir, 559	Carriden, . . . 663

\* The actual number of Districts is 1078—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 18 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

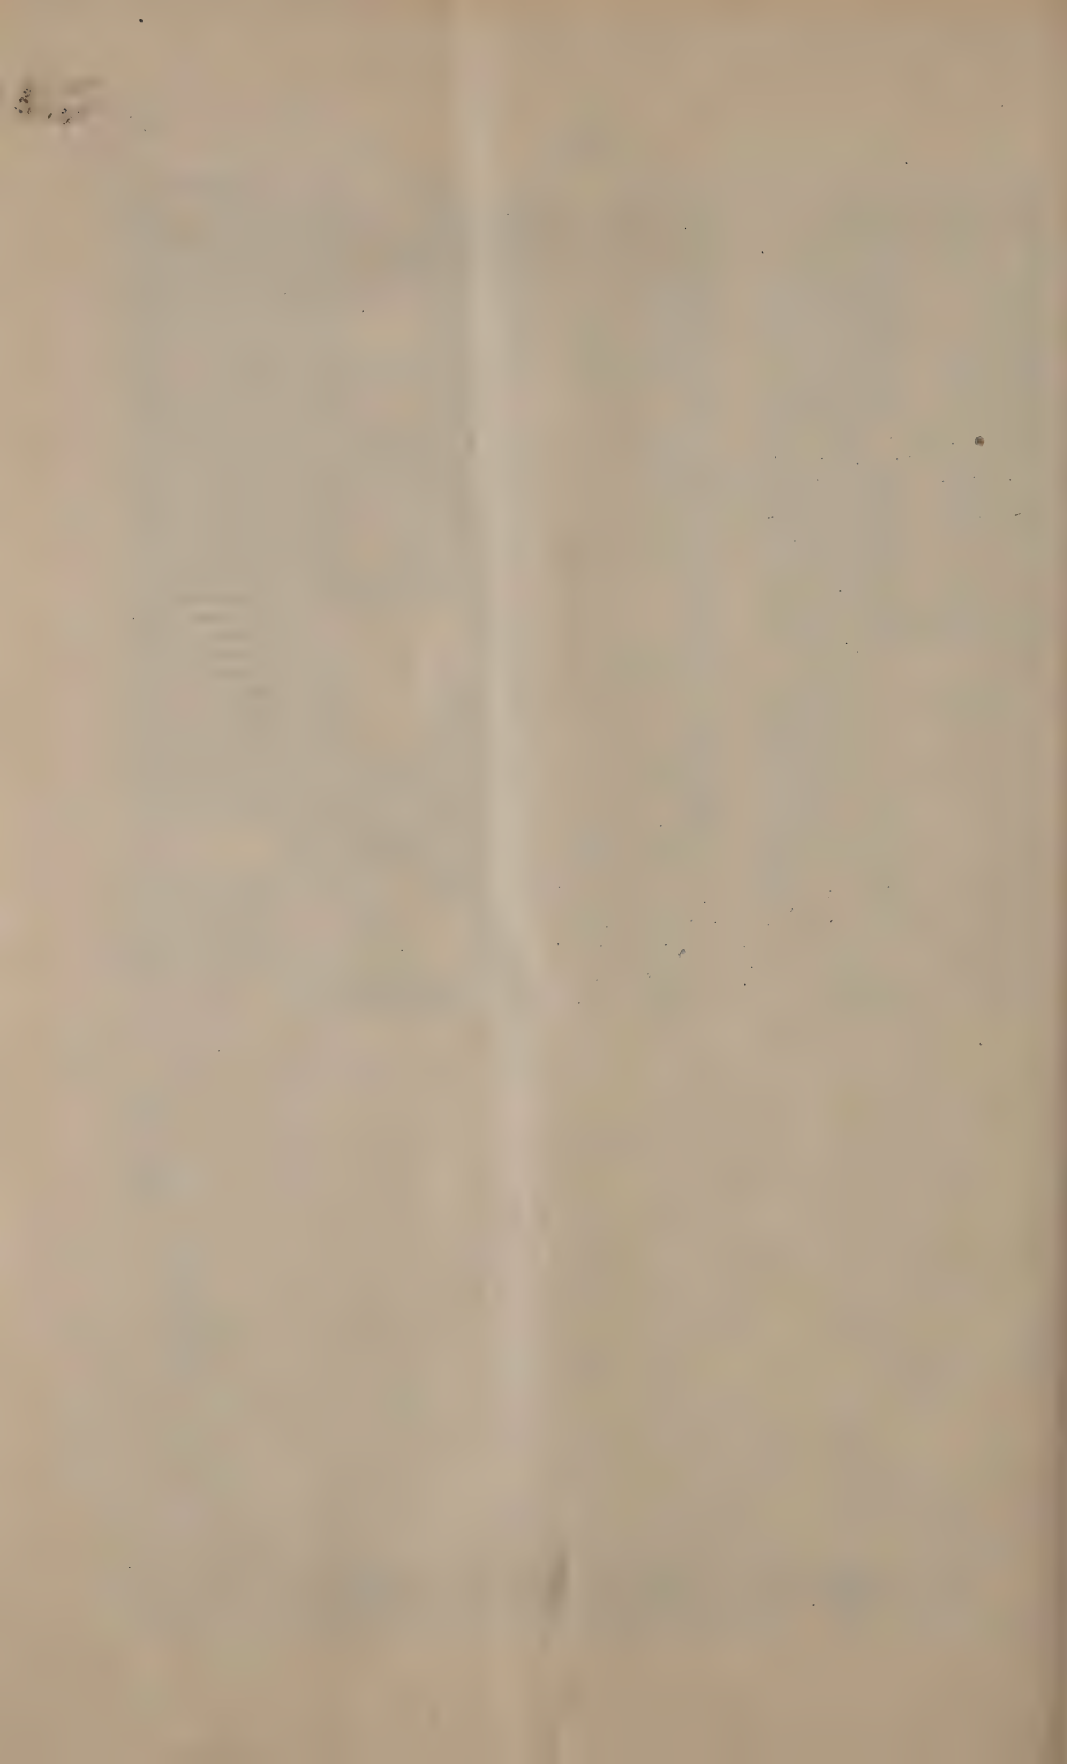

Cramond, . . . 679	Duddingston, . . . 684	Farr, . . . 50	Glenmuick, Tul-lich, etc., . . . 201	Jedburgh, . . . 792

1907.

# REPORT.

During the quarter ending 30th June 1907, there were registered in Scotland the births of 34,511 living children, the deaths of 20,119 persons, and 8864 marriages. These births are 3003 more than those registered in the previous quarter, but 449 fewer than those registered in the second quarter of last year; the deaths are 2516 fewer than those registered in the previous quarter, but 813 more than those registered in the corresponding quarter of last year; the marriages are 1596 more than those registered in the previous quarter, and 165 more than those registered in the corresponding quarter of last year. Compared with the average number of births, deaths, and marriages for the second quarter of the last ten years, those averages being corrected for the increase of population, the births of this quarter are 2414 fewer, the deaths 759 fewer, but the marriages 4 more.

TABLE I.—BIRTHS, DEATHS, and MARRIAGES in SCOTLAND, its Groups of Districts and Divisions during the Quarter ending 30th June 1907, with their Proportion to the Population; also the Illegitimate Births, and their Proportion to the Total Births.

## BIRTHS.

The total number of births registered during the quarter was 34,511, for which number the equivalent annual birth-rate is 29·0 per thousand of the estimated population of Scotland. This birth-rate is 2·2 higher than that of the first quarter of this year, but is 0·7 lower than the birth-rate of the second quarter of the previous year, and 2·0 lower than the mean of the birth-rates of the second quarter of the previous ten years. The birth-rate of the first quarter of this year was reported as the smallest birth-rate yet recorded for the first quarter

of any year since the institution of national registration in 1855. That of this quarter is also a record, for it is the lowest birth-rate recorded for a second quarter, being 0·7 lower than that of the second quarter of 1906, which was the lowest second quarter birth-rate previously recorded in these reports.

In the groups of registration districts the birth-rate of the quarter ranged from 33·8 in the Large Town Districts, to 17·1 in the Insular-Rural Districts. In the Small Town Districts it was 30·4, in the Principal Town Districts 29·5, and in the Mainland-Rural Districts 24·7. With the exception of that of the Large Town Districts, all these rates are lower than the corresponding rates of the second quarter of the previous year.

TABLE II.—Percentage of the Illegitimate Births to the Total Births in the Counties of Scotland during the Quarter ending 30th June 1907.

Counties.	Per Cent.	Counties.	Per Cent.	Counties.	Per Cent.
Shetland .....	5·5	Forfar .....	7·8	Lanark .....	5·1
Orkney .....	5·3	Perth .....	8·7	Linlithgow .....	3·8
Caithness .....	11·0	Fife .....	5·2	Edinburgh .....	6·5
Sutherland .....	5·7	Kinross .....	12·2	Haddington .....	10·0
Ross and Cromarty .....	5·8	Clackmannan .....	7·4	Berwick .....	8·4
Inverness .....	8·9	Stirling .....	5·0	Peebles .....	5·1
Nairn .....	13·0	Dumbarton .....	2·4	Selkirk .....	9·6

Aberdeen .....	12·8	Renfrew .....	4·5	Kirkcudbright .....	9·7
Kincardine .....	8·5	Ayr .....	6·4	Wigtown .....	14·3

In the divisions of the counties the birth-rate of the quarter ranged from 32·5 in the South-Western, to 18·6 in the North-Western. In the West-Midland it was 30·4; in the North-Eastern, 27·6; in the East-Midland, 27·0; in the South-Eastern 26·3; in the Southern 24·1, and in the Northern 19·0.

In the eight principal towns this rate ranged from 30·9 in Greenock, to 23·0 in Edinburgh. In Dundee it was 30·8; in Glasgow, 30·7; in Leith, 30·5; in Paisley, 28·5; in Aberdeen, 28·0; and in Perth, 25·0. The birth-rates of Dundee, Paisley, and Perth are higher than those of the second quarter of last year, but those of Glasgow, Edinburgh, Aberdeen, Leith and Greenock are lower than the corresponding rates of last year.

Of the total births, 2244, or 6·5 per cent, were illegitimate. These illegitimate births are 76 more than in the previous quarter, but 17 fewer than in the corresponding quarter of last year. The illegitimate rate is 0·4 lower than that of the previous quarter, but is the same as that of the second quarter of last year. The illegitimate rate ranged from 9·1 in the Mainland-Rural districts, to 4·8 in the Large Town districts. In the Insular-Rural districts, it was 8·4; in the Principal Town districts 6·3; and in the Small Town districts, 6·0. In the divisions of the counties this rate ranged from 12·6 in the North-Eastern,

to 4·6 in the West-Midland. In the Southern it was 9·9; in the Northern, 7·8; in the North-Western, 7·6; in the East-Midland, 7·0; in the South-Eastern, 6·5; and in the South-Western, 5·2. In the counties this rate ranged from 16·1 in Elgin, 14·3 in Wigtown, 13·0 in Nairn, and 12·8 in Aberdeen, to 2·4 in

Dumbarton, 3·8 in Linlithgow, and 4·5 in Renfrew. In nine counties this rate was 10 per cent. or more, in twenty-one counties it was between 5 and 10 per cent.; in three counties it was less than 5 per cent.

Of the living children whose births were registered during the quarter, 17,653 were male, and 16,858 female. The proportion of male to female children was thus 104·7 to 100.

The daily average number of births registered in April was 395, in May 378, and in June 365.

The birth-rate of the quarter in England and Wales was 27·4, which is 1·6 lower than the Scottish rate for the quarter.

### DEATHS.

Deaths registered during the quarter numbered 20,119, for which the equivalent annual death-rate is 16·9 per thousand. This death-rate is 2·3 less than that of the previous quarter, but is 0·5 higher than that of the second quarter of last year. It is 0·7 less than the mean of the death-rates of the second quarter of the previous ten years.

In the groups of registration districts the death-rate ranged from 17·9 in the Principal Town districts, to 15·4 in the Small Town districts. In the Large Town districts it was 17·5, in the Insular-Rural Districts 16·9, and in the Mainland-Rural districts, 15·8. In the Large and Small Town districts the death-rate of the quarter is the same as that of the second quarter of last year, but in the Principal Town, Mainland-Rural, and Insular-Rural districts it is higher than in that quarter.

In the divisions of the counties the death-rate of this quarter ranged from 17·9 in the South-Western, to 15·0 in the North-Eastern. In the North-Western it was 16·9; in the Northern 16·8; in the South-Eastern, 16·7; in the West-Midland, 16·6; in the Southern, 16·3; and in the East-Midland, 15·7.

The death-rate of the quarter in the Eight Principal Towns ranged from 20·1 in Glasgow, to 14·6 in Aberdeen. In Dundee, it was 19·3; in Greenock, 18·9; in Leith, 18·7; in Perth, 18·6; in Edinburgh, 17·1; and in Paisley, 15·6. In Greenock the death-rate was lower than in the second quarter of the previous year, but in Edinburgh and Paisley it was the same as in that quarter, while in Glasgow, Dundee, Aberdeen, Leith, and Perth, it was higher than in that quarter.

Of the total deaths registered during the quarter, 10,084 were of males, and 10,035 of females.

The average number of deaths registered daily in April was 246; in May, 223; and in June, 194.

The death-rate of the quarter in England and Wales was 14·6, which rate is 2·3 lower than the Scottish rate of the period.

### MARRIAGES.

Marriages registered during the quarter numbered 8864. The equivalent annual marriage-rate is 7·4 per thousand, a rate which is 1·2 higher than that of the previous quarter, but is the same as the rate of the corresponding quarter of

the previous year, and the same as the mean of the rates of the second quarter of the preceding ten years.

In the groups of registration districts the marriage-rate ranged from 8·8 in the Principal Town districts, to 1·9 in the Insular-Rural districts. In the Large Town districts it was 7·6; in the Small Town districts, 6·9; and in the Mainland-Rural districts, 5·4.

In the divisions of the counties the marriage-rate ranged from 8·5 in the South-Eastern, to 3·0 in the Northern. In the South-Western, it was 8·3; in the Southern, 7·7; in the East-Midland, 7·0; in the North-Eastern it was 6·5; in the West-Midland, 6·0; and in the North-Western, 3·5.

The average number of marriages registered daily in April was 104; in May, 33; and in June, 157.

TABLE IV.—Births, Deaths, and Marriages, and their Proportion to the Population, in Eight of the Principal Towns of Scotland, during the Quarter ending 30th June 1907.

### CAUSES OF DEATH IN EIGHT OF THE PRINCIPAL TOWNS.

As nearly 38 per cent. of the population live in eight of the principal towns, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, it may be assumed that the causes of death found to be prevalent in these towns are a fairly good indication of the causes of death prevalent in Scotland generally during the quarter.

The estimated population of these towns is 1,812,171. Deaths registered in them during the quarter numbered 8396, and the equivalent annual death-rate was 18·6 per thousand. The death-rate in April was 20·7; in May, 18·8; and in June, 16·3. The number of deaths registered in them in April was 3083; in May, 2890; and in June, 2423.

Deaths from the acutely infectious diseases numbered 1209; of them, 494 were registered in April, 410 in May, and 305 in June. The death-rate of the quarter from these causes was 2·68; that of April was 3·32; of May, 2·67, and of June, 2·05. This death-rate of the quarter was 0·51 higher than the corresponding death-rate of the previous quarter, and 1·40 higher than that of the second quarter of last year. These deaths included 106 from measles; 25 from scarlet

fever; 591 from hooping-cough; 46 from diphtheria; 2 from typhus fever; 35 from enteric fever; 1 from pyrexia of uncertain origin; and 403 from cerebro-spinal meningitis. The equivalent annual death-rate per 100,000 from hooping-cough is 131; from cerebro-spinal meningitis, 89; from measles, 23; from diphtheria, 10; from enteric fever, 8; and from scarlet fever, 6. Deaths from hooping-cough are 261 more than in the previous quarter, from diphtheria 53 fewer, from measles 30 more, from cerebro-spinal meningitis 10 more, from scarlet fever 2 more, and from typhus fever 1 more; but those from enteric fever are 11 fewer than in that quarter. Of the 403 deaths from cerebro-spinal meningitis, 260 were registered in Glasgow, 73 in Edinburgh, 43 in Leith, 15 in Dundee, 7 in Paisley, 4 in Greenock, and 1 in Aberdeen; of them 177 were registered in April, 143 in May, and 83 in June.

Deaths from diarrhoeas including those registered as due to enteritis and gastro-enteritis numbered 176, the equivalent annual death-rate per 100,000 being 39, a rate which is 5 lower than that of the previous quarter, and which in April was 39, in May 34, and in June 44.

Deaths from tuberculous diseases numbered 1271, for which number the equivalent annual death-rate is 282 per 100,000. These deaths are 105 more than those registered in the previous quarter, and 165 more than those registered in the corresponding quarter of last year. Of these 1271 deaths, 788 were ascribed to phthisis, a number which is 45 more than in the previous quarter, and 69 more than in the corresponding quarter of last year. The equivalent annual death-rate from phthisis was 175 per 100,000.

Deaths during the quarter from malignant disease numbered 472, the equivalent annual death-rate being 105 per 100,000; these deaths are 28 more than in the previous quarter, and 59 more than in the corresponding quarter of last year. Of these deaths, 257 were ascribed to carcinoma, 34 to sarcoma, and 181 to cancer not otherwise defined.

Pneumonia was the ascribed cause of 843 deaths in these towns during the quarter, the equivalent annual death-rate being 187 per 100,000, a rate which in April was 196, in May 198, and in June 166. These deaths are 163 fewer than in the previous quarter, and 42 fewer than in the corresponding quarter of last year. Deaths from bronchitis numbered 480, the equivalent annual death-rate being 106 per 100,000, a rate which in April was 136, in May 96, and in June 87; these deaths are 407 fewer than in the previous quarter, and 62 fewer than in the corresponding quarter of last year.

Deaths from diseases and accidents of pregnancy and child-birth, including puerperal septic conditions, numbered 70: these are 3 more than in the previous quarter, and 13 more than in the corresponding quarter of last year.

Deaths of children of less than one year old numbered 1571. Births during the quarter in these towns numbered 12,985, and thus the infantile mortality per thousand births was 121, a rate which is 22 lower than that of the previous quarter, but 11 higher than that of the corresponding quarter of last year. This rate for the quarter was highest in Dundee, 144, and lowest in Greenock, 87. In Glasgow it was 124; in Edinburgh, 120; in Perth, 120; in Aberdeen, 112;

in Paisley, 111; and in Leith, 107. The Greenock infantile mortality rate for the quarter is lower than that of the corresponding quarter of last year, but those of the remaining towns are higher than those of that quarter.

Of the total deaths registered in these towns during the quarter, 2915, or 34·7 per cent., were of children of less than five years old; and 2034, or 24·2 per cent., were of persons of over sixty. The former are 30 fewer than in the first quarter of this year, but 385 more than in the second quarter of last year; the latter are 509 fewer than in the first quarter of this year, but 53 more than in the second quarter of last year.

Deaths from violent causes during the quarter numbered 315; of them 2 were stated to be homicidal, 28 suicidal, and the remainder accidental. Of the last, 5 were by vehicles and horses, 45 by burns and scalds, 15 by poisons and poisonous gases, 36 by drowning, 10 by overlaying, 26 by other forms of suffocation, and 10 by falls.

#### WEATHER.

The remarks immediately following, on the weather of the quarter, are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports, and refer more particularly to observations made in eight of the Principal Towns:—

*April* was characterised by a low mean pressure; an average mean temperature, with a slightly low mean daily range; an average mean rainfall; an excess of winds from N. and from S.E. *May* was characterised by a low mean pressure; a low mean temperature, with a very low mean daily range; an extremely high mean rainfall, with a large number of days with rain; an excess of winds from N.E. and E. *June* was characterised by a remarkably low mean pressure; a very low mean temperature, with a very low mean daily range; a very high mean rainfall, with a notably large number of days with rain; a considerable excess of Westerly winds.

Observations made *throughout Scotland* show that the mean height of the barometric column, reduced to sea-level and 32° Fahr., was 29·753 inches in April, 29·839 inches in May, and 29·681 inches in June. The mean temperature for the quarter was 47°·4, or 1°·4 below the average mean temperature for the corresponding quarter of the last ten years. The mean temperature in April was 43°·7; in May, 47°·5; and in June, 51°·1. The absolutely highest temperature recorded in April was 66°·0; in May, 79°·0; and in June, 76°·0. The absolutely lowest temperature recorded in April was 21°·0; in May, 23°·0; and in June, 29°·5. Rain fell on 16 days in April, on 18 days in May, and on 24 days in June; the mean amount collected was 2·43 inches in April, 3·96 inches in May, and 4·35 inches in June. Winds from easterly, westerly, northerly, and southerly directions were reported as follows, observations being made twice daily:—Easterly, 25 times in April, 30 times in May, and 14 times in June; westerly, 22 times in April, 18 times in May, and 34 times in June; northerly, 16 times in April, 20 times in May, and 13 times in June; southerly, 18 times in April, 17 times in May, and 24 times in June.

**M.B.**—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLISLE. An asterisk “\*” is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 45. A dagger “†” is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

# METEOROLOGICAL REPORT

FOR THE MONTHS OF

APRIL, MAY, JUNE,

1907.

# DIAGRAM

SHOWING THE STATIONS  
of the

SCOTTISH METEOROLOGICAL SOCIETY.

Reported to the Registrar General of Scotland.

NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY  
FOR THE QUARTER ENDING 30th JUNE 1907.

By Mr A. WATT, M.A., F.R.S.E., under the Direction of the Council of the Scottish Meteorological Society.

THESE returns are founded on the observations made, morning and evening, at 60 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33' N. ; MEAN LONGITUDE = 3° 45' W. ; AND MEAN ELEVATION = 279 Feet.

1907.	BARO- METER at 32° F. and Sea- level.	SELF-REGISTERING THERMOMETERS.					HYGROMETER.				RAIN.		Cloud. Scale of 0-10.	Re- corded Sun- shine.

\* Returns for the individual stations having Sunshine Recorders are given on p. 62.

And when these returns are compared with the averages of 1856-1905, during the same months, they show the following characteristics and differences :—

APRIL 1907—

Mean Barometric Pressure, 29·753 inches ; less than the average of 1856-1905 by 0·130 inch.

Mean Temperature, 43°·7 ; less by 0°·4.

Mean Daily Range of Temperature, 13°·8 ; less by 0°·7.

Mean Humidity, 81 per cent. ; less by 1 per cent.

Rain, Number of Days, 16 ; greater by 1 day.

Rain, Depth in Inches, 2·43 ; greater by 0·16 inch.

Wind, Mean Force (on Scale of 0-12), 2·7 ; being the average.

Wind, Direction of : a 3 days' excess of winds from E. and S.E.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 6·7 ; greater by 0·5.

MAY 1907—

Mean Barometric Pressure, 29·839 inches ; less than the average of 1856-1905 by 0·105 inch.

Mean Temperature, 47°·5 ; less by 1°·5.

Mean Daily Range of Temperature, 13°·2 ; less by 2°·3.

Mean Humidity, 80 per cent. ; greater by 1 per cent.

Rain, Number of Days, 18 ; greater by 5 days.

Rain, Depth in Inches, 3·96 ; greater by 1·67 inch.

Wind, Mean Force (on Scale of 0-12), 2·7 ; greater by 0·2.

Wind, Direction of : a 4 days' excess of winds from between NE. and E.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 7·3 ; greater by 1·1.

## JUNE 1907—

Mean Barometric Pressure, 29·681 inches; less than the average of 1856–1905 by 0·265 inch.

Mean Temperature, 51°·1; less by 3°·8.

Mean Daily Range of Temperature, 13°·0; less by 2°·8.

Mean Humidity, 81 per cent.; greater by 1 per cent.

Rain, Number of Days, 24; greater by 11 days.

Rain, Depth in Inches, 4·35; greater by 1·83 inch.

Wind, Mean Force (on Scale of 0–12), 2·6; greater by 0·2.

Wind, Direction of: a 4 days' excess of winds from between S.W. and N.W.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 7·6; greater by 1·4.

## APRIL 1907—

Hence the month of APRIL 1907 was characterised by a low mean pressure; a slightly low mean temperature, with a slightly low mean daily range; a slightly high mean rainfall; an excess of winds from E. and N.E.

The mean pressure of 29·753 inches or 0·130 inch below the normal, was 0·2 inch below the mean for March. Pressure was rather irregular for the first half of the month, whilst later the fluctuations were less considerable. As a rule depressions affecting our area were of no great depth, but on the morning of the 6th the mercury fell below 29 inches in Northern districts. At Leith the sea-level extremes were 30·251 inches on 25th and 29·179 inches on 7th.

The mean temperature was 43°·7, or 0°·4 below the normal, the nights being of average temperature but the days 0°·7 below. The differences for the individual stations were nowhere great, a few reporting a trifling excess. In most districts the maximum fell on 2nd, the actual highest being 66°·0 at Inverness, but along the East coast from the Firth of Tay to Orkney the warmest day was between 21st and 23rd. The lowest shade temperature was 21°·0 at Wolfelee on 18th, minima mostly occurring about that date under the influence of Northerly winds. At a good many stations the highest temperatures noted were lower than those for March, and at some this was true also of the minima. [*v.* the statistical tables.]

The mean rainfall was 2·43 inches, or 7 per cent. above the normal. Distribution was rather irregular and many of the stations differed but little from their averages. There were no areas of very deficient rainfall, whilst the largest excesses reported were 33 per cent. at Paisley, 36 at Lednathie and 40 at Logie Coldstone. The wettest period was from 2nd to 10th, and in some districts fully two-thirds of the month's rainfall was registered between these dates. In all except Eastern districts rain was frequent from 20th onwards, whilst over a large part of the country the period from 11th to 19th was rainless or all but so. The heaviest daily amounts noted were 1·76 inch at Balmoral on 7th, an amount greater than the entire rainfall at that place for any of the first three months of the year, and falls of about 1 inch at Lednathie on 4th, at Stronvar on 5th and at Leadhills and Kilmarnock on 6th.

The month was of a very changeable character with touches of quite wintry weather, snow, sleet or hail being experienced in most districts about 6th, 18th or 26th.

Thunder at Crieff and in West and South on 2nd; in South East and at Cargen on 8th; at Buchlyvie, Glasgow and Paisley on 10th; at Haddington on 26th and 27th; and in South on 27th.

Bright sunshine not greatly different from the average.

Auroras observed in the Hebrides on 14th; in Shetland on 17th; and at Balmoral on 19th.

## MAY 1907—

Hence the month of MAY 1907 was characterised by a low mean pressure; a low mean temperature, with a very low mean daily range; an extremely high mean rainfall, with a large number of days with rain; an excess of winds from N.E. and E.

The mean pressure was 29·839 inches, or 0·105 inch below the normal. Depressions were rather numerous but of moderate depth, except at the beginning of the month, when a low pressure area of unusual depth for spring, and moving very slowly, travelled across Scotland. On 2nd over an entire area, and in the North of England and Ireland, the mercury fell below 29 inches. At Leith the sea-level extremes were 30·33 inches on 17th and 18th, and 28·73 inches on 2nd.

The mean temperature was 47°·5, or 1°·5 below the normal. The nights were of nearly average temperature but the days deficient by 2°·6. The only interruptions to the generally cold character of the month occurred about 12th and 26th, nearly all stations having their maxima around one or other of these dates. On 26th Lairg reported 79°·0 and Fort William 76°·7, but most stations failed to reach 70°·0 and the low day temperatures were notable. Thus at Aberdeen 60° was reached only on 11th, 13th, 14th and 26th, and the maximum on 30th and 31st was as low as 45°. Lowest

readings occurred on various dates, but generally early in the month, or between 17th and 19th, the actual lowest being 23°0 at Lednathie on 2nd.

The mean rainfall of 3·96 inches, or 73 per cent. above the normal, has been exceeded during the last 50 years only in 1906. In the Orkneys, the extreme North of the mainland and part of West Inverness-shire there was a slight deficiency, but elsewhere there was an excess, very heavy in most districts. Thus Montrose and Arbroath had about thrice their normal amounts, and extensive districts in the East at least double the average. In the Clyde area and most of the South of Scotland the excess was from 80 per cent. upwards. The greater part of the month's rain fell between 1st and 12th, 21st and 24th, and on 30th and 31st. On 23rd falls of considerably more than 1 inch occurred towards the North East (1·89 inch at Logie Coldstone), and on 31st Dundee had 1·06 inch.

The weather was stormy on 2nd, with winds from S.W. Snow fell at Crieff on that day, and showers of sleet or hail were rather frequent in many districts during the month.

Thunderstorms were rather frequent. These as a rule occurred on 8th towards East and North, and on 8th and 12th in South. The thunderstorm on 12th in Southern districts was of great severity.

Bright sunshine was very deficient except towards N.W. and N. Baltasound (199 hours) and Oban (183 hours) averaged 2 hours a day more than Edinburgh (121 hours).

#### JUNE 1907—

Hence the month of JUNE 1907 was characterised by a remarkably low mean pressure; a notably low mean temperature, with a very low mean daily range; an exceptionally high mean rainfall, with a notably large number of days with rain; a considerable excess of winds from a Westerly quarter.

The mean pressure of 29·681 inches, or 0·265 inch below the normal, was decidedly the lowest mean pressure for June since 1860. Throughout the entire month the weather was under the influence of a constant succession of low pressure areas, range being very low and the absence of high readings remarkable. The extremes at Leith were 30·085 inches on 17th and 29·426 inches on 24th.

The mean temperature of 51°·1, or 3°·8 below the normal, was the lowest recorded for June for at least 50 years, and has been approached only in 1888. The temperature deficiency was everywhere well-marked, and increased from East to West; the defect at most Western stations ranging from 4° to 5°. The days were, on the mean, deficient by 5°·2 and the nights by 2°·4. At a good many stations the maximum was below that for May and nearly everywhere the absence of high day temperatures was remarkable. The 9th, 11th or 17th were generally the warmest days, Dumfries registering 76°·0 on 9th; but only one quarter of the stations reached 70°. Lowest temperatures fell as a rule on 4th. The actual lowest, however, was 29°·5 at Baltasound on 1st, but in West and South on 23rd or 25th. On 23rd Balmoral had a shade reading of 32°·0, and on 4th Lairg and Lednathie registered 32°·5.

The mean rainfall of 4·35 inches was as much as 73 per cent. above the normal. Returns from Kingussie and Braemar indicate a restricted area of comparatively low rainfall, but in most districts the excess was very heavy. Along the greater part of the East Coast from Wick to the Tay and for some distance inland most stations had more than twice their normal June amounts, and the excess in the South was also remarkable. Lairg, Glencarron, Buchlyvie and Leadhills had only one rainless day, and many places only three or four such days. The month was notable for the persistency of the rainfall rather than for abnormally heavy individual falls; but we note amounts of over 1 inch in a day at Inverness on 1st, at Dumfries on 4th, at Glencarron on 19th and at Gordon Castle on 24th. On the whole, the month appears to have been the wettest June since 1872, though in June 1897 the rainfall in Eastern districts was at least as heavy.

Storms of thunder and hail were frequent; especially in East and South. Thus at Montrose thunder occurred on six days and at Duns on seven. The severest storms were between 9th and 13th and on 29th, that on the latter date being widespread, but not, apparently, experienced to the West of Paisley or North West of the Grampians.

The cold and wet character of the month was naturally associated with sunshine amounts much below the normal. Baltasound and Oban had less than half the amounts recorded in May.

Fog was somewhat frequent from 5th to 16th, especially around the Orkneys and Shetlands.

## REGISTRARS' NOTES.

---

IN compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

---

### INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

---

*The Figures refer to the Numbers of the Districts in the preceding Tables.*

---

#### I. NORTHERN DIVISION.

##### 1. Shetland.

5 (2). BURRA ISLES.—Three of the four deaths for the quarter were of persons aged 82, 88, and 91 years respectively.

##### 2. Orkney.

31. STRONSAY.—During the quarter the parish has been entirely free from any epidemic.

##### 4. Sutherland.

44 (2). STOER.—Of the ten deaths, seven were of persons aged from 72 to 99 years. The average age of the ten was 71 years.

#### II. NORTH-WESTERN DIVISION.

##### 5. Ross and Cromarty.

##### *Mainland.*

66 (2). SOUTH GAIRLOCH.—The death-rate for the past six months has been abnormally high, despite the fact that no epidemic has appeared in the District.

81. ROSSKEEN.—One of the deaths recorded in May was a case of suicide.

**6. Inverness.**

*Mainland.*

926. CANNICH.—The two deaths registered were of comparatively old people.

103. KIRKHILL.—An epidemic of scarlet fever prevailed in the early part of the quarter, but no deaths resulted.

104. LAGGAN.—One of the three deaths registered was that of a young man who fell over a precipice.

*Insular.*

111 (1). NORTH HARRIS.—A case of typhoid fever has occurred in the village of Tarbart.

118 (1). BENBECULA.—Pneumonia has been the certified cause of several deaths during the quarter.

**III. NORTH-EASTERN DIVISION.**

**9. Banff.**

145. ABERLOUR.—Four of the deaths in June were of children in an orphanage, and were due to measles.

148. BOTRIPHNIE.—The only death registered during the quarter was that of an infant.

**10. Aberdeen.**

172. AUCHINDOIR AND KEARN.—Of the seven deaths registered, two were of persons aged 80 and 81 years respectively.

173. AUCHTERLESS.—Three cases of scarlet fever occurred in the District in June. All three children were removed to Turriff District Hospital.

181. CLUNY.—The death in April was that of an infant who died from cerebro-spinal fever. No more cases have occurred.

201. GLENMUICK.—One of the deaths registered during the quarter was caused by drowning.

225. NEW DEER.—Of the twenty-six persons whose deaths were registered during the quarter, five were aged over 60, five over 70, and six over 80 years.

226. NEWHILLS.—The City Parish Council of Aberdeen have now transferred the inmates of their two Poorhouses in the City to the new buildings at Oldmill in this Parish, hence the increase in the number of deaths recorded during June.

231 (2). WEST PETERCULTER.—Two of the deaths recorded were accidental, one being by shooting and the other by poisoning.

232 (1). PETERHEAD.—An epidemic of enteric fever has broken out in Peterhead, and several deaths have already been certified as due to this disease.

**11. Kincardine.**

259. FORDOUN.—The three persons whose deaths were registered in May were aged 72, 76, and 82 years respectively. One death registered in June was the result of an accident.

265. MARYKIRK.—Among the children attending Marykirk School an epidemic of measles, several cases of diphtheritic throat, and one very serious case of septic diphtheria occurred. One case of measles resulted fatally.

**IV. EAST-MIDLAND DIVISION.**

**12. Forfar.**

284. EASSIE AND NEVAY.—The females who died were aged 86 and 87 years respectively, while the male was aged 71 years.

**13. Perth.**

331. BALQUHIDDER.—The illegitimate birth was that of the child of a vagrant tinker.

334. BLAIR ATHOLL.—The only death registered during the quarter was that of a woman aged 89 years.

341a. COMRIE.—Of the seven persons whose deaths were registered, the average age was 76 years.

378. MADDERTY.—The death registered in May was that of a woman aged 92 years.

387. PERTH (Landward).—The two male deaths occurred in the Corporation Isolation Hospital, and were due to cerebro-spinal disease. They were the only cases that occurred in the Perth District. The female death was a case of drowning.

389. RATTRAY.—Six of the nine deaths in June were of persons whose ages ranged from 70 to 81 years.

**14. Fife.**

417. CRAIL.—The five deaths were of persons aged from 63 to 86 years.

455. SALINE.—Of the seven deaths registered, four were of persons aged from 72 to 88 years.

458b. TULLIALLAN.—One of the deaths was due to a colliery accident.

## V. WEST-MIDLAND DIVISION.

## 19. Argyll

*Mainland.*

509. CUMLODDEN AND MINARD.—Whooping-cough prevalent during the quarter, the deaths of two infants being attributable to that cause.

510 (2). KILMUN.—Of the five deaths, one was that of a man who was accidentally drowned, and another that of a male aged 67 years, who had been resident in the District for three days only.

513. INVERARAY.—The illegitimate child whose birth was registered has been legitimated by the subsequent marriage of the parents.

515. KILBRANDON AND KILCHATTAN.—The ages of the seven persons whose deaths were registered ranged from 70 to 100 years.

525 (1). LISMORE.—The average age of the four persons whose deaths have been registered this year was 81 years.

527 (2). KILMORICH.—Of the four deaths registered, two were of persons aged 83 and 86 years respectively. One death was by accidental drowning.

## 20. Bute.

557. NORTH BUTE.—Of the nine deaths registered, two were sudden and two were of persons found dead. One of the four deaths was due to suffocation, and the three others to heart disease.

558. ROTHESAY.—Whooping-cough was somewhat prevalent during the month of June, three of the deaths being attributable thereto.

## VI. SOUTH-WESTERN DIVISION.

## 22. Ayr.

577 (1). AUCHINLECK.—Of the nine persons whose deaths were registered, one was aged under one year. The others were aged from 45 to 83 years.

578 (3). ALLOWAY.—Of the twenty-one deaths registered, fifteen occurred in Ayr District Asylum. Of the six others, one was caused by scarlet fever.

613 (2). CATRINE.—Of the twelve deaths, three were of persons aged 78, 82, and 86 years respectively.

616. STEWARTON.—Of the twelve deaths registered, three were of infants, and seven of persons aged from 60 to 80 years.

## 23. Lanark.

639. DALZIEL.—Of the deaths registered during the quarter, cerebro-spinal meningitis accounted for seventeen in the Burgh of Motherwell, and for twenty-nine in the Landward portion of the district. Most of the latter occurred in the County Hospital.

643. EAST KILBRIDE.—Of the thirteen deaths, four were caused by tuberculosis.

## VII. SOUTH-EASTERN DIVISION.

## 25. Edinburgh.

677. COLINTON.—Seven of the eight illegitimate births, and 69 of the 90 deaths, occurred in Craiglockhart Poorhouse.

682. CURRIE.—Births for the quarter much above the average. The number registered in the first six months of this year exceeds last year's total by two. Of the persons whose deaths were registered, six were aged 69 years or over. One was non-resident.

686. FALA AND SOUTRA.—The death registered resulted from diphtheria.

692 (1). NORTH LEITH.—Epidemic cerebro-spinal meningitis accounted for twenty-four of the deaths registered during the quarter.

## 26. Haddington.

717. PRESTONKIRK.—Two of the illegitimate births occurred in the Combination Poorhouse.

## 27. Berwick.

735. DUNS.—Of the nine deaths registered, five were of women aged from 74 to 90 years.

747. LANGTON.—No deaths occurred during the first five months of the year. The two registered in June were of females aged 73 and 79 years respectively.

## 28. Peebles.

760. EDDLESTON.—The death registered was that of a man aged 70 years. Of the five persons whose deaths have been registered this year, the average age was 70·8 years.

772. TWEEDSMUIR.—The death registered in April was that of a man about 50 years of age, whose body was discovered by a shepherd near the top of Gameshope Glen. It had seemingly lain for some time, and it is thought that he may have perished in one of the snowstorms in February or March.

VIII. SOUTHERN DIVISION.

30. Roxburgh.

783. BOWDEN. — Measles has not been so prevalent for upwards of 40 years.

795. LILLIESLEAF. — Of the two deaths registered, one was a case of suicide by drowning, and the other that of a man aged 78 years.

799 (1). MELROSE. — Of the twenty-three deaths, six occurred in the District Asylum.

31. Dumfries.

8135. BRYDEKIRK. — The deaths are all of persons aged 60 years and upwards.

830. HOLYWOOD. — The only death registered since January was that of a woman aged 75 years, who was killed on the railway.

834. KIRKCONNEL. — Marriages above the average, chiefly owing to miners having good wages at present.

836. KIRKMICHAEL. — Of the six marriages registered during the quarter, in two cases the brides were aged 16 and 19 years respectively.

32. Kirkcudbright.

8576. BARGRENNAN. — The two deaths registered during the quarter are those of the parish minister, aged 85 years, and of a man aged about 60 years, whose body was found among the hills, where it appeared to have lain for a considerable time. Measles prevalent during the latter part of the quarter.

860. CARSPHAIRN. — One of the deaths is that of a man aged 84 years.

33. Wigtown.

900. WHITHORN. — Excluding one child, the average age of the persons whose deaths were registered was 72 years.

## INDEX TO THE DISTRICTS.

*The Figures refer to the Numbers of the Districts in the preceding Tables of Births, Deaths, and Marriages, these being numbered consecutively from 1 to 901.\**

Ardclach, . . . 120	Barra, . . . 108	Bressay, . . . 1	Carnwath, . . . 632	Crailing, . . . 786

\* The actual number of Districts is 1078—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 18 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

1907.

# REPORT.

During the quarter ending 30th September 1907 there were registered in Scotland the births of 31,427 living children, the deaths of 15,721 persons, and 8994 marriages. These births are 3084 fewer than the births registered in the previous quarter, and 682 fewer than those registered in the corresponding quarter of last year. The deaths are 4398 fewer than those registered in the previous quarter, and 718 fewer than those registered in the corresponding quarter of last year. The marriages are 130 more than those registered in the previous quarter, and 418 more than those registered in the corresponding quarter of last year. Compared to the average number of births, deaths, and marriages registered in the third quarter of the last ten years, the averages being corrected for increase of population, the births are 3382 less, the deaths 2670 less, but the marriages 397 more.

TABLE I.—BIRTHS, DEATHS, and MARRIAGES in SCOTLAND, its Groups of Districts, and Divisions during the Quarter ending 30th September 1907, with their Proportion to the Population; also the Illegitimate Births, and their Proportion to the Total Births.

## BIRTHS.

The total number of births registered during the quarter, 31,427, is equivalent to an annual birth-rate of 26.1 per thousand, a rate which is 2.9 less than that of the previous quarter, 0.9 less than that of the corresponding quarter of last year, and 2.8 less than the mean of the birth-rates of the third quarter of the previous ten years. It is the lowest quarterly birth-rate recorded for Scotland, not only the lowest birth-rate of a third quarter but the lowest of any quarter since the institution of national registration.

The birth-rate of the quarter ranged from 29.1 in the Large Town Registra-

tion districts, to 22·0 in the Insular-Rural districts. In the Small Town Registration districts it was 27·2, in the Principal Town districts, 26·3, and in the Mainland-Rural districts, 23·3. The birth-rate in the Insular-Rural districts is higher than that of the previous quarter but the birth-rates in the remaining groups of districts are lower than in that quarter.

In the divisions of the counties the birth-rate of the quarter ranged from 28·8 in the South-Western, to 20·5 in the Northern. In the West-Midland it was 27·8; in the East-Midland, 24·0; in the North-Eastern, 23·8; in the South-Eastern, 23·7; in the North-Western 22·7; and in the Southern 22·3. The birth-rates in the Northern and North-Western divisions are higher than those of the previous quarter, but those of the remaining divisions are lower than in that quarter.

TABLE II.—Percentage of the Illegitimate Births to the Total Births in the Counties of Scotland during the Quarter ending 30th September 1907.

Counties.	Per Cent.	Counties.	Per Cent.	Counties.	Per Cent.

Kincardine .....	9·2	Ayr .....	5·2	Wigtown .....	12·0

In the eight principal towns the birth-rate of the quarter ranged from 30·1 in Greenock, to 20·5 in Perth, and 20·9 in Edinburgh. In Glasgow it was 27·4; in Leith, 26·2; in Dundee, 25·5; in Paisley, 25·4; and in Aberdeen, 23·8.

Of the total births, 1975, or 6·3 per cent., were illegitimate. These illegitimate births are 269 fewer than those registered in the previous quarter, and 316 fewer than those registered in the corresponding quarter of last year. The illegitimate rate is 0·2 lower than that of the previous quarter, and 0·8 lower than that of the corresponding quarter of last year. In the groups of registration districts the illegitimate rate ranged from 8·4 in the Mainland-Rural districts, to 3·5 in the Insular-Rural districts. In the Principal Town districts it was 6·6; in the Small Town districts, 5·2; and in the Large Town districts, 4·7. In the divisions of the counties this rate ranged from 11·9 in the North-Eastern and in the Southern, to 4·4 in the West-Midland. In the East-Midland, it was 6·3; in the South-Eastern, 6·1; in the South-Western, 5·3; in the North-Western, 5·0; and in the Northern, 4·8. In the counties this rate ranged from 14·6 in Kirkcudbright, 14·5 in Elgin, 13·3 in Banff, and 12·0 in Wigtown; to 0·7 in Shetland, 3·3 in Fife, 3·6 in Stirling, and 3·8 in Ross and Cromarty. In nine

counties the illegitimate rate of the quarter was less than 5 per cent. of the total births, in 16 counties it was between 5 and 10 per cent., in 8 counties it was more than 10 per cent.

Of the children whose births were registered during the quarter, 16,128 were

male, and 15,299 female. The proportion of male to female births was thus 105·4 to 100.

The average number of births registered daily in July was 368, in August 332, and in September 325.

The birth-rate of the quarter in England and Wales was 26·1, which is the same as the Scottish birth-rate of the quarter.

#### DEATHS.

Deaths registered during the quarter numbered 15,721, for which the equivalent annual death-rate is 13·1 per thousand. This death-rate is 3·8 less than that of the previous quarter, 0·7 less than that of the corresponding quarter of last year, and 2·2 less than the mean of the death-rates of the third quarter of the previous ten years. It is the lowest quarterly national death-rate yet recorded in these quarterly reports; the previous lowest was that of the third quarter of 1906, but as above stated the rate of this quarter is 0·7 lower than that of that quarter.

In the groups of registration districts the death-rate of the quarter ranged from 13·8 in the Insular-Rural districts to 12·7 in the Small Town districts. In the Large Town districts it was 13·7, in the Principal Town districts, 13·1, and in the Mainland-Rural districts, 12·8. The death-rate of the Mainland-Rural districts is the same as that in the corresponding quarter of last year, but those of the remaining groups of districts are each lower than in that quarter.

In the divisions of the counties the death-rate ranged from 14·0 in the North-Western, to 12·4 in the North-Eastern; in the West-Midland, it was 13·5; in the Northern, 13·3; in the South-Western, 13·2; in the South-Eastern, 13·0; in the Southern, 13·0; and in the East-Midland, 12·9. In the North-Western and North-Eastern Divisions of the Counties the death-rate was higher than in the third quarter of last year, but in the other divisions of the counties it was lower than in that quarter.

The death-rate of the quarter in the Eight Principal Towns ranged from 15·2 in Dundee, to 11·4 in Aberdeen; in Glasgow it was 14·3; in Perth, 14·1; in Edinburgh, 13·5; in Greenock, 13·0; in Paisley, 12·8; and in Leith, 11·6. The death-rate of the quarter in Edinburgh is higher than the death-rate of the third quarter of last year, but in the remaining towns it is lower than in that quarter.

Of the total deaths registered during the quarter, 7804 were of males, and 7917 of females.

The average number of deaths registered daily in July was 187; in August, 162; and in September, 163.

The death-rate of the quarter in England and Wales was 12·1, which is 1·0 lower than the Scottish death-rate of the quarter.

#### MARRIAGES.

Marriages registered during the quarter numbered 8994. The equivalent annual marriage-rate is 7·5 per thousand, a rate which is 0·1 higher than that of

the previous quarter, 0·3 higher than that of the corresponding quarter of last year, and 0·4 higher than the mean of the marriage-rates of the third quarter of the previous ten years.

In the groups of registration districts the marriage-rate ranged from 9·5 in the Principal Town districts, to 1·5 in the Insular-Rural districts. In the Large Town districts it was 8·2; in the Small Town districts, 6·6; and in the Mainland-Rural districts, 4·0.

In the divisions of the counties the marriage-rate ranged from 8·8 in the South-Eastern, to 2·8 in the North-Western. In the South-Western, it was 8·4; in the East-Midland, 6·8; in the North-Eastern, 6·5; in the West-Midland, 6·4; in the Southern, 5·4; and in the Northern, 3·0.

The average number of marriages registered daily in July was 146; in August, 63; and in September, 84.

TABLE IV.—Births, Deaths, and Marriages, and their Proportion to the Population, in Eight of the Principal Towns of Scotland, during the Quarter ending 30th September 1907.

#### CAUSES OF DEATH IN EIGHT OF THE PRINCIPAL TOWNS.

As nearly 38 per cent. of the population of Scotland live in eight of the principal towns, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, it may be assumed that the causes of death found to be prevalent in these towns during the quarter are a fairly good indication of the causes of death prevalent in Scotland generally during the quarter. Detail of the causes of death in the remainder of Scotland is not yet available.

The estimated population of these eight towns is 1,812,171. Deaths in them during the quarter numbered 6246, and the equivalent annual death-rate was 13·7 per thousand. Deaths registered in them in July averaged 72 daily, in August 65 daily, and in September 67 daily.

Deaths from the acutely infectious diseases numbered 578; of them, 226 were registered in July, 202 in August, and 150 in September. The death-rate of the quarter from these causes was 1·27; that of July being 1·47, of August 1·31, and of September 1·01. This death-rate of the quarter from these causes is 1·41 less than that of the previous quarter, but is 0·41 higher than the correspond-

ing death-rate of the third quarter of last year. These deaths included 61 from measles; 19 from scarlet fever; 263 from hooping-cough; 47 from diphtheria; 34 from enteric fever; 1 from pyrexia of uncertain origin; and 153 from cerebro-spinal meningitis. There were no deaths in these towns during the quarter from either small-pox or typhus fever. The equivalent annual death-rate per 100,000 in these towns from hooping-cough was 58; from cerebro-spinal meningitis, 34; from measles, 13; from diphtheria, 10; from enteric fever, 7; and from scarlet fever, 4. Deaths from measles were 45 fewer than in the previous quarter, from scarlet fever 6 fewer, from hooping-cough 328 fewer, from diphtheria 1 more, from enteric fever 1 fewer and from cerebro-spinal meningitis 250 fewer than in that quarter. Of the deaths from cerebro-spinal meningitis, 96 were registered in Glasgow, 27 in Edinburgh, 12 in Leith, 9 in Dundee, 5 in Paisley, 2 in Aberdeen, 1 in Greenock, and 1 in Perth; of them 61 were registered in July, 48 in August, and 44 in September.

Deaths from diarrhoeas, including those certified as due to enteritis and gastro-enteritis, numbered 253, for which the equivalent annual death-rate is 55 per 100,000, a rate which is 16 higher than that of the previous quarter, but 83 lower than that of the third quarter of last year.

Deaths from tuberculous diseases numbered 882, of them 518 being attributed to phthisis. Deaths from tuberculous disease are 389 fewer than in the previous quarter, and 39 fewer than in the corresponding quarter of last year, while those from phthisis are 270 fewer than in the previous quarter, and 10 fewer than in the corresponding quarter of last year. The equivalent annual death-rate per 100,000 from tuberculous diseases is 193, and that from phthisis 113; the former is 89 less than the corresponding rate of the previous quarter, and the latter 62 less than the corresponding rate of that quarter.

Deaths from malignant disease numbered 449, they are 23 fewer than in the previous quarter, 4 more than in the third quarter of last year, and are equivalent to an annual death-rate from those causes of 98 per 100,000. Of these deaths, 250 were ascribed to carcinoma, 16 to sarcoma, and 183 to cancer not otherwise defined.

Pneumonia was the ascribed cause of 508 deaths in these towns during the quarter, a number which is 335 fewer than in the previous quarter, but 69 more than in the third quarter of last year. The equivalent annual death-rate from pneumonia was 111 per 100,000, a rate which in July was 137, in August 90, and in September 107. Deaths from bronchitis numbered 292, the equivalent annual death-rate being 64 per 100,000, a rate which in July was 76, in August 59, and in September 57; these deaths are 188 fewer than those in the previous quarter, but are 28 more than those in the corresponding quarter of last year.

Deaths from diseases and accidents of pregnancy and child-birth, including those attributed to puerperal septic conditions, numbered 51: they are 19 fewer than in the previous quarter, but 8 more than in the third quarter of last year.

Deaths of children of less than one year old numbered 1226. Births during the quarter numbered 11,615, and thus the infantile mortality rate amounted to 106 per thousand births, a rate which is 15 lower than that of the previous quarter,

and 23 lower than that of the corresponding quarter of last year. This rate for the quarter ranged from 139 in Dundee to 50 in Perth. In Edinburgh it was 111; in Glasgow, 106; in Aberdeen, 106; in Leith, 105; in Paisley, 85; and in Greenock, 59. This rate in Edinburgh is higher than that of the third quarter of last year, but in the remaining seven towns it is lower than in that quarter.

Of the total deaths registered in these eight towns, 2036, or 32·6 per cent., were of children of less than five years old; and 1592, or 25·5 per cent., were of persons of over sixty. The former are 879 fewer than in the previous quarter, and 259 fewer than in the third quarter of last year; the latter are 442 fewer than in the previous quarter, but 21 more than in the third quarter of last year.

Deaths from violence numbered 287; they are 28 fewer than in the previous quarter, and 9 fewer than in the corresponding quarter of last year; of them 2 were attributed to homicide, 22 to suicide, and 263 to accident.

### WEATHER.

The remarks immediately following, on the weather of the quarter, are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports, and refer more particularly to observations made in eight of the Principal Towns:—

*July* was characterised by a rather high mean pressure; a low mean temperature, with an average mean daily range; a rather low mean rainfall; a decided excess of Easterly winds. *August* was characterised by a rather low mean pressure; a very low mean temperature, with a daily range about the average; a high mean rainfall; a decided excess of winds from W. and N.W. *September* was characterised by a high mean pressure; a rather high mean temperature, with a large mean daily range; a low mean rainfall; and a slight excess of Easterly winds.

Observations made *throughout Scotland* show that the mean height of the barometric column, reduced to sea-level and 32° Fahr., was 29·976 inches in July, 29·799 inches in August, and 30·046 inches in September. The mean temperature for the quarter was 54°·2, or 1°·7 below the average mean temperature for the corresponding quarter of the last ten years. The mean temperature in July was 55°·4; in August 53°·6; and in September 53°·5. The absolutely highest temperature recorded in July was 87°·0; in August 73°·0; and in September 87°·0. The absolutely lowest temperature recorded in July was 35°·0; in August 32°·0; and in September 27°·8. Rain fell on 15 days in July, on 28 in August, and on 11 in September; the mean amount collected was 2·44 inches in July, 4·61 inches in August, and 1·47 inches in September. Winds from easterly, westerly, northerly, and southerly directions were reported as follows, observations being made twice daily:—Easterly, 23 times in July, 9 times in August, and 11 times in September; westerly, 27 times in July, 42 times in August, and 36 times in September; northerly, 22 times in July, 15 times in August, and 10 times in September; southerly, 16 times in July, 22 times in August, and 24 times in September.

[illegible]

*N. B.*—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk “\*” is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 46.

A dagger “†” is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING  
TABLES BY AN ASTERISK (\*).

No.	Districts.	Component Parts (Parishes).
<b>2. Orkney.</b>		
13	Birsay .. ..	Part of Harray and Birsay.
14	Deerness .. ..	Part of St Andrews and Deerness.
18	Harray .. ..	Part of Harray and Birsay.
22	North Ronaldshay .. ..	Part of Cross and Burness.
25	St Andrews .. ..	Part of St Andrews and Deerness.
26	Sanday .. ..	Lady, and part of Cross and Burness.
<b>3. Caithness.</b>		
37b	Kelss .. ..	Parts of Canlsbay and Wick.
<b>5. Ross and Cromarty.</b>		
58	Applecross .. ..	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch .. ..	Parts of Contin and Urray.
86b	Carloway .. ..	Parts of Barvas and Uig.
87	Lochs .. ..	Lochs and part of Uig.
<b>6. Inverness.</b>		
92b	Cannich .. ..	Parts of Kilmorack and Kiltarlity.
112	Kilmuir .. ..	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
<b>8. Elgin.</b>		
135	Elgin .. ..	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
<b>9. Banff.</b>		
152	Enzie .. ..	Parts of Belle and Rathven.
155b	Glenrinnnes .. ..	Parts of Aberlour and Mortlach.
167	Seafeld .. ..	Parts of Cullen and Rathven.
<b>10. Aberdeen.</b>		
171b	Ardallie .. ..	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninnmonth .. ..	Parts of Crimond, Longside, Lomnay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone and part of Glenmuick.
222b	Milbren .. ..	Parts of Fyvie and Monquhitter.
227b	New Pitsligo .. ..	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter .. ..	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoeh .. ..	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells .. ..	Parts of Auchterless and Forgue.
<b>11. Kincardine.</b>		
266	Nigg .. ..	Nigg, and part of Aberdeen.
<b>12. Forfar.</b>		
282	Dundee .. ..	Dundee Combination and part of Mains and Strathmartine.
294b	Kilry .. ..	Parts of Glenisla and Lintrathen.
<b>13. Perth.</b>		
324	Aberfeldy .. ..	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven .. ..	Parts of Auchtergaven and Logiealmond.
331	Balquhiddier .. ..	Balquhiddier, and part of Comrie.
344	Dowally .. ..	Part of Dunkeld and Dowally.
349	Dunkeld .. ..	Part of Dunkeld and Dowally.
355b	Foss .. ..	Parts of Blair-Athol and Dull.
361	Killin .. ..	Parts of Kenmore and Killin.
375	Logiealmond .. ..	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle .. ..	Meigle, and part of Coupar-Angus.
386b	Persie .. ..	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth .. ..	Perth, and part of Kinnoull.
393b	Stanley .. ..	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan .. ..	Part of Killin.
394c	Tenandry .. ..	Parts of Blair-Athol and Moulin.
<b>14. Fife.</b>		
402	Anstruther-Easter .. ..	Anstruther-Easter, and part of Kilrenny.
417	Crall .. ..	Part of Crall and May Island.
423	Dunbog .. ..	Dunbog, and part of Flisk.
425	Dunino .. ..	Dunino, and part of Crall.
442	Kirkcaldy and Abbotshall	Part of Kirkcaldy and Dysart.
457b	Thornton .. ..	Part of Kirkcaldy and Dysart and of Markinch.
<b>17. Stirling.</b>		
473	Bonnybridge .. ..	Parts of Denny, Dunipace, and Falkirk.
488	St Ninians .. ..	Parts of St Ninians and Stirling.
490	Stirling .. ..	Parts of St Ninians and Stirling.

CONSTITUTION OF THE DISTRICTS—*continued.*

No.	Districts.	Component Parts (Parishes).
<b>18. Dumbarton.</b>		
496	Dumbarton .. ..	Dumbarton, and parts of Cardross and Old Kilpatrick.
<b>19. Argyll.</b>		
504	Ardochattan .. ..	Part of Ardochattan and Muckkairn.
505	Arduamurchan .. ..	(1) Parts of Arduamurchan, and of Arisaig and Moldart.
506	Ballachulish, etc. ..	Parts of Kilmallie and Ardgour.
509	Cumlodden and Minard ..	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan ..	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc. .. ..	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishall; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie .. ..	Parts of Kilmallie and Ardgour.
525	Lismore .. ..	Lismore and Appin, and part of Ardgour.
526	Lochgilphead .. ..	Parts of Glassary and South Knapdale.
529	Muckkairn .. ..	Parts of Ardochattan and Muckkairn, and Glenorchy and Inishall.
535	Tarbert .. ..	Parts of Kilcalmonell, Saddle and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow) ..	Part of Kilarrow and Kilmeny.
543	Kilmeny .. ..	Part of Kilarrow and Kilmeny.
545	Kinlochspelve .. ..	Part of Pennygown and Torosay.
547	Portnahaven .. ..	Part of Kilchoman.
548	Salen .. ..	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory .. ..	Part of Kilninian and Kilmore.
550	Torosay .. ..	Part of Pennygown and Torosay.
<b>20. Bute.</b>		
556	Lochranza .. ..	Parts of Kilbride and Kilmorey.
<b>21. Renfrew.</b>		
559b	Bridge of Weir .. ..	Part of Houston and Killellan and of Kilbarchan.
572	Neilston .. ..	(1) Part of Neilston; (2) Remainder of Neilston and part of Paisley.
<b>22. Ayr.</b>		
576	Ardrossan .. ..	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
578(3)	Ayr (Alloway) .. ..	Parts of Ayr and Maybole.
584b	Crosshill .. ..	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine .. ..	Irvine, and part of Dundonald.
603	Loudoun (Darvel) .. ..	Parts of Loudoun and Galston.
610b	Patna .. ..	Parts of Dalmeilington, Dalrymple, Kirkmichael, and Straiton.
<b>23. Lanark.</b>		
622	Barony .. ..	Part of Glasgow.
626a	Cadder (Eastern district) ..	Parts of Cadder and Glasgow.
626b	Calderhead .. ..	Parts of Cambusnethan and Shotts.
644	Glasgow .. ..	Parts of Glasgow, Govan Combination, and Rutherglen.
<b>25. Edinburgh.</b>		
695b	New Craighall .. ..	Parts of Inveresk and Liberton.
698b	Stobhill .. ..	Parts of Borthwick, Cockpen, and Newbattle.
<b>29. Selkirk.</b>		
774a	Caddonfoot .. ..	Caddonfoot, and part of Innerleithen.
<b>30. Roxburgh.</b>		
787b	Edgerston .. ..	Parts of Jedburgh and Southdean.
<b>31. Dumfries.</b>		
813b	Brydekirk .. ..	Parts of Annan, Cummertrees, and Hoddum.
830	Holywood .. ..	Holywood, and part of Terregles.
853b	Wanlockhead .. ..	Part of Sanquhar.
<b>32. Kirkcudbright.</b>		
857b	Bargrennan .. ..	Parts of Minnigaff and Penninghame.
862	Corsockbridge .. ..	Parts of Balmacellian, Kirkpatrick-Durham, and Parton.
864	Dalbeattie .. ..	Part of Urr.
<b>33. Wigtown.</b>		
899	Stranraer .. ..	Stranraer, and parts of Inch and Leswalt.

# METEOROLOGICAL REPORT

FOR THE MONTHS OF

JULY, AUGUST, SEPTEMBER,

1907.

**DIAGRAM**  
**SHOWING THE STATIONS**  
**of the**  
**SCOTTISH METEOROLOGICAL SOCIETY.**  
Reported to the Registrar General of Scotland.

NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY  
FOR THE QUARTER ENDING 30th SEPTEMBER 1907.

By Mr A. WATT, M.A., F.R.S.E., under the Direction of the Council of the Scottish Meteorological Society.

THESE returns are founded on the observations made, morning and evening, at 60 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33' N. ; MEAN LONGITUDE = 3° 45' W. ; AND MEAN ELEVATION = 279 Feet.

1907.	BARO-METER at 32° F. and Sea- level.	SELF-REGISTERING THERMOMETERS.					HYGROMETER.				RAIN.		Cloud. Scale of 0-10.	Re- corded Sun- shine.

\* Returns for the individual stations having Sunshine Recorders are given on p. 62.

And when these returns are compared with the averages of 1856-1905, during the same months, they show the following characteristics and differences :—

JULY 1907—

Mean Barometric Pressure, 29·976 inches ; greater than the average of 1856-1905 by 0·084 inch.

Mean Temperature, 55·4 ; less by 1°·9.

Mean Daily Range of Temperature, 14°·6 ; less by 0°·3.

Mean Humidity, 82 per cent. ; being the average.

Rain, Number of Days, 15 ; being the average.

Rain, Depth in Inches, 2·44 ; less by 0·68 inch.

Wind, Mean Force (on Scale of 0-12), 2·2 ; less by 0·2.

Wind, Direction of : a 5 days' excess of winds from between N.W. and E.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 7·4 ; greater by 0·8.

AUGUST 1907—

Mean Barometric Pressure, 29·799 inches ; less than the average of 1856-1905 by 0·057 inch.

Mean Temperature, 53°·6 ; less by 3°·0.

Mean Daily Range of Temperature, 13°·9 ; less by 0°·6.

Mean Humidity, 83 per cent. ; less by 1 per cent.

Rain, Number of Days, 24 ; greater by 8 days.

Rain, Depth in Inches, 4·61 ; greater by 0·93 inch.

Wind, Mean Force (on Scale of 0-12), 2·6 ; greater by 0·3.

Wind, Direction of : a 6 days' excess of winds from between S.W. and N.W.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 7·1 ; greater by 0·5.

## SEPTEMBER 1907—

Mean Barometric Pressure, 30·046 inches; greater than the average of 1856–1905 by 0·180 inch.

Mean Temperature, 53°·5; greater by 0°·7.

Mean Daily Range of Temperature, 16°·0; greater by 2°·0.

Mean Humidity, 84 per cent.; less by 1 per cent.

Rain, Number of Days, 11; less by 5 days.

Rain, Depth in Inches, 1·47; less by 2·05 inch.

Wind, Mean Force (on Scale of 0–12), 2·1; less by 0·5.

Wind, Direction of: a 2 days' excess of winds from S.W. and W.

Hours of Sunshine, *v. p.* 62.

Mean Amount of Cloud, 6·0; less by 0·3.

## JULY 1907—

Hence the month of JULY 1907 was characterised by a rather high mean pressure; a low mean temperature, with a slightly low mean daily range; a rather low mean rainfall; a considerable excess of winds from between N.W. and E.

The mean pressure was 29·976 inches or 0·084 inch above the normal. From 10th to 21st the weather was controlled by an extensive high-pressure system, but at the beginning and end of the month conditions were very unsettled, the deepest depression occurring on 3rd and 4th. At Leith the extremes were 30·521 ins. on 15th and 29·506 ins. on 4th.

The mean temperature was 55°·4, or 1°·9 below the normal, the days being 2°·0 and the nights 1°·7 below their respective averages. The month proved, on the whole, the coldest July since 1902, the temperature defect being greatest in the Eastern half of the country. The first week of the month appears to have been the coldest week experienced in July for a good many years, and some low day temperatures were reported, Lairg and Glencarron failing to reach 50° on 5th. Some high day temperatures occurred about the middle of the month, but on the East coast the reversion to cold weather was abrupt. Thus, at Leith the maximum on 16th was 81°·8, but on 19th only 59°·2. The highest shade temperatures were 87°·0 at Buchlyvie and 86°·3 at Lairg on 16th. Minima fell generally on 1st, 2nd, 7th, and 11th, the actual lowest being 35°·0 at Leadhills on 11th and 30th.

The mean rainfall was 2·44 inches, or 22 per cent. below the normal. Midlothian had about its average amount, but in general there was a well-marked shortage amounting to 40 per cent. and over in many districts. At Lerwick and Deerness the aggregate was but little over 1 inch. The heavy rains of June were prolonged until about July 13th, when an abrupt change took place in sympathy with the dominating high-pressure system above noted. A rainless spell of about 12 days' duration was followed by a recurrence of rainy weather from 26th onwards. The heaviest falls took place on 4th (0·77 in. at Edinburgh); on 7th; on 11th and 12th (1·92 in. at Lochbuie on 12th); and at the close of the month (1·08 in. at Dalkeith on 29th).

Sleet at Balmoral on 1st. Hail in North and North East, and at Crieff and Leadhills on 1st; at Wolfelee on 5th; and Balruddery, Buchlyvie and Paisley on 9th.

Solar halos noted at Paisley on 14th; and at Drumlanrig on 21st.

Thunderstorms at Kelso on 1st; at Wolfelee on 1st, 5th, and 28th; in South of Scotland on 21st; and in Lothians and Berwickshire on 29th. Thunder was heard at Duns on 8 days.

Sunshine, as in May and June, was very deficient on the East Coast. On the West the month was rather sunnier than usual, Glasgow with 156 hours registering 24 hours more than Edinburgh.

Coast fog was frequent between 11th and 17th.

## AUGUST 1907—

Hence the month of AUGUST 1907 was characterised by a rather low mean pressure; an abnormally low mean temperature, with a slightly low mean daily range; a high mean rainfall, with a large number of days with rain; a decided excess of winds from between S.W. and N.W.

The mean pressure was 29·799 inches, or 0·057 inch below the normal, the defect ranging from more than 0·1 inch over Shetland to a nominal amount in the South. Depressions were numerous, and the weather of the Scottish area was hardly ever under the control of a high-pressure system. At Leith the sea-level extremes were 30·226 inches on 21st and 29·455 inches on 10th.

The mean temperature was 53°·6, or 3°·0 below the normal, the days being 3°·3 and the nights 2°·7 below their respective averages. Taking Scotland as a whole, the low day temperatures appear to have been unprecedented during at least 50 years, though in 1881, 1885 and 1902, the actual mean temperature of the month was as low, or almost so. The temperature defect was everywhere well marked, exceeding 4° at Fort Augustus and Fort William. There was an almost entire absence of seasonable warmth, and only seven stations had a maximum for the month as high as 70°, whilst there were days in many districts on which the thermometer failed to reach 60°. The highest readings reported were 73°·0 at Kilmarnock on 17th, and 71°·0 at Lairg on 22nd; but, as a rule,

the warmest days were 4th, 5th or between 8th and 12th. Lowest readings occurred on 2nd, or during the last week of the month, Leadhills reporting 32°0 in shade on 30th, on which day Crathes registered 5° of frost in the open, and Balmoral 4°.

The mean rainfall was 4·61 inches or 25 per cent. above the normal. To the North East of the Grampians and towards the Borders there was a moderate deficiency, but in general there was an excess which at many Western stations amounted to more than 50 per cent. Glenquoich had more than 15 inches of rain; Lochbuie (Mull) more than 12, and Fort William 10½. At Glencarron rain fell on 31 days, and at many stations on 27 or more. Lochbuie registered 2·15 inches on 8th, and falls of at least 1 inch on 10th, 24th and 28th. The wettest period in the Southern half of the country was from 11th to 15th, Glasgow having 1·32 inch on 11th. Towards the North West, the heaviest falls occurred from 8th to 10th, around 19th and during the last week of the month. The absence of heavy falls towards the North East was noteworthy, the wettest day at King's College, Aberdeen, being 2nd, with only 0·26 inch.

Sleet and hail fell at Balmoral on 31st, hail at Dundee and Dalkeith on that day, and in Shetland on 20th and 24th.

Thunder in the Orkneys and Mull on 11th; in some districts South of the Forth and Clyde on 12th; at Aberdeen on 6th, 18th and 31st; at Duns on 15th, 16th, and 28th. Thunderstorms of any severity occurred only very locally.

Solar halos noted at Baltasound on 3rd and at Paisley on 6th.

Fog was of unimportant occurrence for a summer month.

Sunshine was on the whole deficient, more so in the West than in the East, and very sunny days were of rare occurrence.

Auroras observed in Shetland on 2nd and 7th.

#### SEPTEMBER 1907—

Hence the month of SEPTEMBER 1907 was characterised by a high mean pressure; a rather high mean temperature, with a large mean daily range; a very low mean rainfall; a slight excess of winds from S.W. and W.

The mean pressure was 30·046 inches, or 0·180 inch above the normal. Unsettled conditions early in the month were followed by a long period of high pressure, the barometer at sea-level at Leith remaining all but continuously above 30 inches from 7th to 23rd. The extremes at Leith were 30·549 inches on 21st and 29·434 inches on 2nd.

The mean temperature was 53°·5, or 0°·7 above the normal, the days being 1°·7 above and the nights 0°·3 below their respective averages. A good many stations practically agreed with their normals, and in Shetland there was a decided deficiency. Early in the month very low temperatures for the time of year occurred, many stations reporting shade readings below 32° on 3rd or 4th, the actual lowest being 27°·8 at Kingussie, whilst Balmoral had a temperature in the open as low as 21°. Thereafter until almost the end of the month mild conditions prevailed. Indeed the highest temperature of the month at Poltalloch occurred on 30th, that at Kingussie on 29th, and that at Fort William and some stations in South West and South on 28th. But, in general, the 10th was the warmest day, readings of 87°·0 at Lairg, 83°·2 at Loanhead (Logie Coldstone), and 80°·0 at Gordon Castle being the highest recorded at these places during the present year.

The mean rainfall was 1·47 inch, or 59 per cent. below the normal. In Shetland and at Leith there was only a slight deficiency, but in nearly all districts the shortage was very pronounced, and, taking the country as a whole, the month proved the driest September since 1894. Large areas received decidedly less than 1 inch of rain, and aggregates of more than 2 inches occurred only at some Western stations and in Shetland. The wet weather of August was prolonged until 5th or 6th of the month, Lochbuie having 1·25 inch on 2nd and Leith 1·02 inch on the same day. Rain was again fairly general on 11th, but thereafter, except towards North and North West, an almost continuous dry spell prevailed until nearly the close of the month. At Dumfries, after 3rd, the month was rainless except for small falls on 11th and 30th, and there were considerable areas approximating to these conditions. At Baltasound (Shetland), at the other extreme, rain fell on 26 days.

Rather stormy weather was experienced towards the North on 2nd, 3rd and 6th, whilst on 16th a gale was general round the Coast from Tarbet Ness to Cape Wrath, and in the Orkneys and Shetlands.

Thunderstorms of moderate severity occurred in West and South West on 10th or 11th. A solar halo noted at Leith on 25th.

Towards North West, North East and South East, large amounts of sunshine were recorded. At Crathes on Deeside, the large total of 194 hours represented 51 per cent. of the possible, and an average of 2½ hours sunshine per day more than in August and 3 hours per day more than in June; Edinburgh and Glasgow had about their normal amounts.

During the last four or five days of the month dense fog prevailed almost continuously along the East Coast; on the West, fog occurred more sporadically.

An Aurora was widely observed on 10th, and at Fort William and Gordon Castle on 30th.

## REGISTRARS' NOTES.

---

IN compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

---

### INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

---

*The Figures refer to the Numbers of the Districts in the preceding Tables.*

---

#### I. NORTHERN DIVISION.

##### 1. Shetland.

5 (2). BURRA ISLES.—Four of the five deaths in September were caused by drowning through the upsetting of an open boat.

##### 4. Sutherland.

44 (2). STOER.—Three of the six deaths for the quarter were of persons aged 83, 88, and 92 years respectively.

54. LOTH.—The three males whose deaths were registered were all aged over 80 years.

## II. NORTH-WESTERN DIVISION.

### 5. Ross and Cromarty.

#### *Mainland.*

58. APPLECROSS.—Two of the three deaths were of persons aged 76 and 88 years respectively.

### 6. Inverness.

#### *Mainland.*

92a (2). Whooping-cough of a mild type prevalent. No deaths therefrom.

99 (2). LOCHABER.—The two deaths registered this quarter were both accidental, the one being by a fall down a precipice on Ben Nevis, the other by drowning in the River Spean at High Bridge.

#### *Insular.*

117 (2). SOUTH SNIZORT.—The three females whose deaths were registered were aged 82, 84, and 92 years respectively.

## III. NORTH-EASTERN DIVISION.

### 8. Elgin.

144 (2). GARMOUTH.—Of the four illegitimate births, in only one case was the mother permanently resident in the district.

### 9. Banff.

145. ABERLOUR.—Five of the deaths were of children in an orphanage, and were mostly due to measles.

### 10. Aberdeen.

173. AUCHTERLESS.—Of the ten deaths registered, six were of persons whose united ages amounted to 428 years. There was one fresh case of scarlet fever in September.

182. COULL.—The death registered was that of a female aged 90 years. The only other death recorded this year was that of another female aged 80 years.

201. GLENMUICK, TULLIOH, AND GLENGAIRN.—Two of the deaths were of persons aged over 90 years.

### 11. Kincardine.

251 (2). PORTLETHEN.—The death registered in August was the result of an accident at a level crossing.

259. FORDOUN.—The two deaths registered in September were of persons aged 84 and 93 years respectively.

## IV. EAST-MIDLAND DIVISION.

### 12. Forfar.

271. ARBIRLOT.—Measles prevalent in the Parish during the quarter.

272 (2). ST VIGEANS.—The disparity between the number of births (15) and of deaths (0) is very remarkable.

### 13. Perth.

332. BENDOCHY.—Though no marriages have been celebrated in this District during the past quarter, two or three have been celebrated elsewhere by parties resident in the Parish.

377. LONGFORGAN.—Of the eight deaths, seven were of persons whose ages ranged from 50 to 85 years.

379. MEIGLE.—Of the four persons whose deaths were registered, one was aged 94, and another 101 years.

### 14. Fife.

434. KENNOWAY.—During the last fortnight of the quarter, four cases of scarlet fever occurred amongst children. The cases are slight, and no deaths have occurred.

453b. TULLIALLAN.—Of the five deaths, three were of persons whose ages ranged from 64 to 86 years.

## V. WEST-MIDLAND DIVISION.

## 17. Stirling.

469. AIRTH.—Two of the three deaths were caused by accidental drowning.

## 18. Dumbarton.

502 (2). KILCREGGAN AND COVE.—In neither of the two cases of illegitimate birth was the mother a resident in the District.

## 19. Argyll.

*Mainland.*

510 (1). DUNOON.—The "illegitimates" are all children of non-residents. Of the persons who died, sixteen were non-resident.

515. KILBRANDON AND KILCHATTAN.—The ages of those whose deaths were registered during the quarter ranged from 44 to 91 years, the average being 76. Two outbreaks of scarlet fever, affecting six persons, have occurred, but no deaths have resulted.

517 (2). DALAVICH.—Parties belonging to this District usually celebrate their marriage elsewhere, the consequence being that only one marriage has been registered here during the past nine years.

## 20. Bute.

553 (2). KILBRIDE.—Of the seven deaths registered, three were of summer visitors. The ages of the others ranged from 65 to 90 years. A mild type of scarlatina broke out in Lamlash in September, but no deaths have resulted.

## VI. SOUTH-WESTERN DIVISION.

## 21. Renfrew.

569. KILMACOLM.—Of the eleven deaths registered, six were of inmates of Quarrier's Homes and Sanatoria, three were of visitors, and two were of actual residents whose ages were 65 and 81 years.

572 (2). BARRHEAD AND LEVERN.—The number of deaths registered in September is the lowest for that month since 1897, with the exception of 1904, when the number was also 10.

## 22. Ayr.

578 (3). ALLOWAY.—Of the seventeen deaths registered, fifteen occurred in the Ayr District Asylum. The two others were of persons aged 74 and 78 respectively.

579. BALLANTRAE.—The scarcity of dwelling-houses accounts for the removal of a large percentage of young married people to more populous centres.

594. GIRVAN.—Of the twenty deaths, 5 were of visitors.

607. MUIRKIRK.—Births numbered twenty-six, as compared with fifty-five for the corresponding quarter of last year.

616. STEWARTON.—Five of the thirteen deaths were of children of less than one year old.

## VII. SOUTH-EASTERN DIVISION.

## 25. Edinburgh.

677. COLINTON.—Forty of the deaths registered occurred in Craighlockhart Poorhouse.

## 26. Haddington.

705. DIRLETON.—Of the eight deaths registered, three were of children aged under three months.

## 27. Berwick.

737. ECCLES.—The birth-rate for the quarter is the lowest recorded for this Parish since the passing of the Registration Act. An epidemic of mumps prevailed in August and September.

742. GORDON.—The four deaths registered were those of males aged from 58 to 82 years.

749. LEGERWOOD.—The only death registered was certified as having been due to "spotted fever."

## 29. Selkirk.

776. KIRKHOPE.—Of the three deaths registered, two were very sudden.

**VIII. SOUTHERN DIVISION.**

**30. Roxburgh.**

795. LILLIESLEAF.—The death registered was that of a child aged 13 months. It was supposed to be due to cerebral meningitis.

799 (1). MELROSE.—Eight of the twenty deaths occurred in the District Asylum.

**31. Dumfries.**

837 (2). KIRKPATRICK-FLEMING (Southern).—Of the eight deaths, two were of persons from other parishes who died in the poorhouse.

**32. Kirkcudbright.**

870. KIRKBEAN.—The death registered in September is the first for the year.

874. KIRKPATRICK-DURHAM.—Three cases of scarlatina occurred during August.

882. TROQUEER.—Scarlet fever prevalent during September. No deaths therefrom.

**33. Wigtown.**

885. GLASSERTON.—The deaths registered were those of an infant a few days old and of a person aged 72 years. The marriage in August is the first recorded this year.

886. INCH.—Three of the seven deaths were accidental. One was caused by shooting, another by a motor-cycle accident, and the third by a motor car.

# INDEX TO THE DISTRICTS.

\* The actual number of Districts is 1078—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 18 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

1908.

# REPORT.

During the quarter ending 31st December 1907 there were registered in Scotland the births of 31,343 living children, the deaths of 18,792 persons, and 8134 marriages. These births are 84 fewer than the births registered in the previous quarter, and 532 fewer than those registered in the corresponding quarter of last year. These deaths are 3071 more than those registered in the previous quarter, but 560 fewer than those registered in the corresponding quarter of last year. These marriages are 860 fewer than those registered in the previous quarter, and 412 fewer than those registered in the corresponding quarter of last year. Compared to the average number of births, deaths, and marriages registered in the fourth quarter of the last ten years, those averages being corrected for increase of population, the births of this quarter are 2225 below the average, the deaths 1463 below the average, and the marriages 647 below the average.

## BIRTHS.

The total number of births registered during the quarter, 31,343, is equivalent to an annual birth-rate of 26·1 per thousand of the estimated population, a rate which is the same as that of the previous quarter, but 0·7 less than the birth-rate of the fourth quarter of the previous year, and 1·8 less than the mean of the rates of the fourth quarter of the last ten years. The birth-rate of this quarter, 26·1, is the lowest birth-rate yet recorded for any fourth quarter, and is the same as the birth-rate of the third quarter of this year, which was reported to be the lowest quarterly birth-rate ever recorded in Scotland.

The birth-rate of the quarter in the Large Town districts was 29·2, in the Small Town districts 26·8, in the Principal Town districts 26·3, in the Mainland-Rural districts 23·4, and in the Insular-Rural districts 19·6. Compared to the birth-rates of the previous quarter, the rates of the Large Town and Mainland-Rural districts are slightly higher, that of the Principal Town districts is the same, and those of the Small Town and Insular-Rural districts are lower.

In the divisions of the counties the birth-rate of the quarter ranged from 28·6 in the South-Western, to 18·8 in the Southern. In the West-Midland it was 27·0; in the North-Eastern, 25·0; in the East-Midland, 24·6; in the South-Eastern, 24·0; in the Northern, 22·8; and in the North-Western, 20·3. In the North-Western, West-Midland, South-Western and Southern divisions of the counties the birth-rate was lower than in the previous quarter, but in the Northern, North-Eastern, East-Midland and South-Eastern, it was higher than in that quarter.

TABLE II.—Percentage of the Illegitimate Births to the Total Births in the Counties of Scotland during the Quarter ending 31st December 1907.

Counties.	Per Cent.	Counties.	Per Cent.	Counties.	Per Cent.
Shetland .....	3·9	Forfar.....	9·3	Lanark .....	5·5
Orkney.....	5·2	Perth .....	4·9	Linlithgow.....	3·8

Kincardine .....	8·8	Ayr.....	6·4	Wigtown .....	11·5

In the eight principal towns the birth-rate of the quarter ranged from 30·0 in Greenock, to 21·3 in Edinburgh. In Glasgow it was 27·6; in Leith, 27·1; in Dundee, 26·1; in Aberdeen, 24·6; in Paisley, 24·4; and in Perth, 23·2.

Of the total births, 1955, or 6·2 per cent., were illegitimate. These are 20 fewer than what were registered in the previous quarter, and 184 fewer than what were registered in the corresponding quarter of last year. The illegitimate rate is 0·1 less than that of the previous quarter, and 0·5 less than that of the fourth quarter of last year. In the groups of registration districts the illegitimate rate of the quarter ranged from 7·7 in the Mainland-Rural districts, to 4·8 in the Insular-Rural districts. In the Principal Town districts it was 6·3; in the Small Town districts, 5·8; and in the Large Town districts, 5·0. In the divisions of the counties this rate ranged from 11·3 in the North-Eastern, to 4·5 in the West-Midland. In the Southern it was 8·9, in the East-Midland, 6·6; in the Northern, 6·3; in the South-Eastern, 6·1; in the North-Western, 5·8; and in the South-Western, 5·3. In the counties this rate ranged from 12·9 in Selkirk,

12·5 in Kirkcudbright, 12·3 in Banff, and 12·2 in Nairn; to 2·9 in Sutherland, 3·2 in Dumbarton, and 3·8 in Linlithgow. In ten counties this rate for the quarter was less than 5 per cent., in 14 counties it was between 5 and 10 per cent., in 9 counties it was more than 10 per cent.

Of the children whose births were registered during the quarter, 15,978 were male, and 15,365 female. The proportion of male to female births was thus 104·0 to 100.

The average daily number of births registered during the quarter was 341; that average in October was 352, in November 328, and in December 342.

The birth-rate of the quarter in England and Wales was 24·9, which is 1·2 less than the birth-rate of the quarter in Scotland.

### DEATHS.

Deaths registered in Scotland during the quarter numbered 18,792, for which the equivalent annual death-rate is 15·6 per thousand. This death-rate is 2·5 higher than the death-rate of the previous quarter, but 0·7 lower than the death-rate of the corresponding quarter of the previous year, and 1·2 less than the mean of the death-rates of the fourth quarter of the previous ten years. The death-rate is the lowest death-rate yet recorded for a fourth quarter; it is 0·1 less than that of the fourth quarter of 1905, which previously was the smallest recorded death-rate of a fourth quarter.

In the groups of registration districts the death-rate of the quarter ranged from 16·8 in the Principal Town districts, to 13·8 in the Insular-Rural districts. In the Large Town districts it was 15·7, in the Small Town districts 14·8, and in the Mainland-Rural districts 13·9. In the Insular-Rural districts the death-rate was the same as in the previous quarter, but in the other groups of districts it was higher than in that quarter.

In the divisions of the counties the death-rate of the quarter ranged from 16·8 in the South-Western, to 13·2 in the North-Eastern. In the East-Midland it was 16·0; in the Northern, 15·1; in the West-Midland, 14·9; in the North-Western, 14·7; in the South-Eastern, 14·7; and in the Southern, 13·4. In all the divisions of the counties the death-rate was higher than in the previous quarter.

The death-rate of the quarter in the Eight Principal Towns ranged from 21·5 in Dundee, to 12·4 in Aberdeen. In Greenock it was 20·7; in Perth, 19·2; in Glasgow, 18·2; in Leith, 16·6; in Paisley, 15·7; and in Edinburgh, 14·8. In all these towns the death-rate was higher than in the previous quarter.

Of the total deaths registered during the quarter, 9314 were of males, and 9478 of females.

The average number of deaths registered daily during the quarter was 204; that average in October was 178, in November 198, and in December 236.

The death-rate of the quarter in England and Wales was 14·7, which is 0·9 lower than the Scottish death-rate of the quarter.

### MARRIAGES.

Marriages registered during the quarter numbered 8134. The equivalent annual marriage-rate is 6·7 per thousand, a rate which is 0·8 less than that of the previous quarter, 0·5 less than that of the fourth quarter of last year, and 0·6 less than that of the fourth quarter of the previous ten years.

In the groups of registration districts the marriage-rate of the quarter ranged from 7·7 in the Principal Town districts, to 4·1 in the Insular-Rural districts. In the Large Town districts it was 6·6; in the Small Town districts, 6·2; and in the Mainland-Rural districts, 5·4. In the divisions of the counties the marriage-rate of the quarter ranged from 7·3 in the South-Eastern, to 4·9 in the North-Western. In the North-Eastern, it was 7·2; in the Southern, 6·9; in the South-Western, 6·9; in the East-Midland, 6·8; in the Northern, 6·0; and in the West-Midland, 5·3.

The average number of marriages registered daily during the quarter was 88; that average in October was 68, in November 68, and in December 128.

#### CAUSES OF DEATH IN EIGHT OF THE PRINCIPAL TOWNS.

As nearly 38 per cent. of the population of Scotland live in eight of the principal towns, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, it may be assumed that the causes of death found to be prevalent in them during the quarter are a fairly good indication of the causes of death prevalent in Scotland generally during the quarter. Detail of the causes of death in the remainder of Scotland during the quarter is not yet available.

The estimated population of these eight towns is 1,812,171. Deaths in them during the quarter numbered 7861, and the equivalent annual death-rate is 17·2 per thousand.

Deaths from the acutely infectious diseases numbered 943; of which 193 were registered in October, 280 in November, and 470 in December. The death-rate of the quarter from these causes is 2·07, which is 0·80 higher than the death-rate from these causes in the previous quarter, and 0·90 higher than the death-rate from these causes in the fourth quarter of last year. This death-rate in October was 1·25, in November 1·88, and in December 3·06. These deaths include 487 from measles, which is 426 more than in the previous quarter; 220 from hooping-cough, which is 43 fewer than in the previous quarter; 1 from small-pox; 39 from scarlet fever; 92 from diphtheria; 2 from typhus fever; 31 from enteric fever; 70 from cerebro-spinal meningitis; and 1 from pyrexia of

uncertain origin. The equivalent annual death-rate per 100,000 from measles is 107; from hooping-cough, 48; from diphtheria, 20; from enteric fever, 7; and from cerebro-spinal meningitis, 15. The deaths from cerebro-spinal meningitis are 83 fewer than in the previous quarter, and 333 fewer than in the second quarter of the year. Of the 70 deaths from cerebro-spinal meningitis registered during the quarter, 43 were in Glasgow, 11 in Edinburgh, 1 in Dundee, 1 in Aberdeen, 4 in Paisley, 8 in Leith, and 2 in Greenock.

Deaths from diarrhoeas, including those certified as due to enteritis and gastro-enteritis, numbered 288, the equivalent annual death-rate being 63 per 100,000, a rate which is 8 higher than that of the previous quarter, but 24 lower than that of the corresponding quarter of last year.

Deaths from tubercle numbered 946; they are 64 more than those of the previous quarter, but 34 fewer than those of the fourth quarter of last year. The death-rate of the quarter from tubercle was 207 per 100,000, a rate which is 14 higher than that of the previous quarter, but 11 lower than that of the fourth quarter of last year. Of the deaths from tubercle, 587 were ascribed to phthisis, a number which is 69 more than in the previous quarter, but 20 fewer than in the corresponding quarter of last year. The death-rate from phthisis was 129 per 100,000, a rate which is 16 higher than the rate of the previous quarter, but 6 lower than the rate of the fourth quarter of last year.

Deaths from malignant disease numbered 453, they are 4 more than in the previous quarter, but 25 fewer than in the fourth quarter of last year. The death-rate from malignant disease amounted to 99 per 100,000, a rate which is 1 higher than in the previous quarter, but 7 lower than in the fourth quarter of last year. Of these deaths, 253 were ascribed to carcinoma, 22 to sarcoma, and 178 to cancer not otherwise defined.

Pneumonia was the ascribed cause of 860 deaths in these towns during the quarter, 209 being in October, 280 in November, and 371 in December. These deaths are 352 more than in the previous quarter, but 12 fewer than in the corresponding quarter of last year. The death-rate of the quarter from pneumonia was 188 per 100,000, a rate which in October was 136, in November 188, and in December 241. Deaths from bronchitis numbered 627, the equivalent annual death-rate being 137. These deaths are 335 more than in the previous quarter, and 26 more than in the fourth quarter of last year. The death-rate from bronchitis in October was 83, in November 134, and in December 194.

Deaths from diseases and accidents of child-birth, including those registered as due to puerperal septic conditions, numbered 60: they are 9 more than in the previous quarter, but 22 fewer than in the corresponding quarter of last year.

Deaths of children of less than one year old numbered 1700. Births in these towns during the quarter numbered 11,765, and thus the infantile mortality rate was 144, a rate which is 38 more than in the previous quarter, but 11 less than in the fourth quarter of last year. This rate for the quarter ranged from 194 in Dundee to 114 in Aberdeen. In Greenock, it was 160; in Glasgow, 145; in Perth, 142; in Paisley, 137; in Edinburgh, 135; and in Leith, 128.

Of the total deaths registered in these towns, 2938, or 37·4 per cent., were

of children of less than five years old ; and 1901, or 24·2 per cent., were of persons of over sixty. The former are 902 more than those in the previous quarter, and 118 more than those in the fourth quarter of last year ; the latter are 309 more than those of the previous quarter, but 255 fewer than those of the fourth quarter of last year.

Deaths from violence numbered 283 ; they are 4 fewer than in the previous quarter, and 53 fewer than in the corresponding quarter of last year ; of them 1 was homicidal, 14 suicidal, and 268 accidental.

#### WEATHER.

The remarks immediately following, on the weather of the quarter, are extracted from the Meteorological Returns which appear in the Registrar-General's Monthly Reports, and refer more particularly to observations made in eight of the Principal Towns :—

*October* was characterised by an extremely low mean pressure ; a rather high mean temperature, with a low mean daily range ; an exceptionally high mean rainfall ; and an excess of winds from N. and N.E. *November* was characterised by a rather high mean pressure ; a slightly high mean temperature, with an average mean daily range ; a low mean rainfall ; and a slight excess of winds from S.E. and S. *December* was characterised by a low mean pressure ; a slightly high mean temperature, with a low mean daily range ; a high mean rainfall ; and a large excess of Easterly winds.

Observations made *throughout Scotland* show that the mean height of the barometric column, reduced to sea-level and 32° Fahr., was 29·611 inches in October, 29·895 inches in November, and 29·628 inches in December. The mean temperature for the quarter was 42°·5, or 0°·4 below the average mean temperature for the corresponding quarter of the last ten years. The mean temperature in October was 47°·4 ; in November 41°·5 ; and in December 38°·5. The absolutely highest temperature recorded in October was 70°·0 ; in November 59°·7 ; and in December 54°·2. The absolutely lowest temperature recorded in October was 20°·0 ; in November 15°·0 ; and in December 10°·0. The mean number of days on which rain fell was 23 in October, 17 in November, and 21 in December ; the mean amount collected was 5·62 inches in October, 3·15 inches in November, and 4·67 inches in December. Winds from easterly, westerly, northerly, and southerly directions were reported as follows, observations being made twice daily :—*Easterly*, 26 times in October, 16 times in November, and 21 times in December ; *westerly*, 20 times in October, 29 times in November, and 27 times in December ; *northerly*, 16 times in October, 13 times in November, and 11 times in December ; *southerly*, 23 times in October, 22 times in November, and 28 times in December.

*E.B.*—Districts containing Parliamentary or Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk \* is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 45. A dagger † is prefixed to those Districts, which consist of only a part of the Civil Parish of the same name. ‡ Return not relived. The figures given are those for the corresponding quarter of 1906.

**CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING  
TABLES BY AN ASTERISK (\*).**

No.	Districts.	Component Parts (Parishes).
<b>2. Orkney.</b>		
13	Birsay .. ..	Part of Harray and Birsay.
14	Deerness .. ..	Part of St Andrews and Deerness.
18	Harray .. ..	Part of Harray and Birsay.
22	North Ronaldshay ..	Part of Cross and Burness.
25	St Andrews .. ..	Part of St Andrews and Deerness.
26	Sanday .. ..	Lady, and part of Cross and Burness.
<b>3. Caithness.</b>		
37b	Keiss .. ..	Parts of Canisbay and Wick.
<b>5. Ross and Cromarty.</b>		
58	Applecross .. ..	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch .. ..	Parts of Contin and Urray.
86b	Carloway .. ..	Parts of Barvas and Uig.
87	Lochs .. ..	Lochs and part of Uig.
<b>6. Inverness.</b>		
92b	Cannich .. ..	Parts of Kilmorack and Kiltarlity.
112	Kilmuir .. ..	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
<b>8. Elgin.</b>		
135	Elgin .. ..	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
<b>9. Banff.</b>		
152	Enzie .. ..	Parts of Bellie and Rathven.
155b	Glenrannes .. ..	Parts of Aberlour and Mortlach.
167	Seafeld .. ..	Parts of Cullen and Rathven.
<b>10. Aberdeen.</b>		
171b	Ardallie .. ..	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmonth .. ..	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone and part of Glenmuick.
222b	Millbex .. ..	Parts of Fyvie and Monquhitter.
227b	New Pitsligo .. ..	Parts of Aberdour, New Deer, Strichen, and Tyle.
231	Peterculter .. ..	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch .. ..	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells .. ..	Parts of Auchterless and Fergie.
<b>11. Kincardine.</b>		
266	Nigg .. ..	Nigg, and part of Aberdeen.
<b>12. Forfar.</b>		
282	Dundee .. ..	Dundee Combination and part of Mains and Strathmartine.
294b	Kilry .. ..	Parts of Glenisla and Lintrathen.
<b>13. Perth.</b>		
324	Aberfeldy .. ..	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven .. ..	Parts of Auchtergaven and Logiealmond.
331	Balquhiddel .. ..	Balquhiddel, and part of Comrie.
344	Dowally .. ..	Part of Dunkeld and Dowally.
349	Dunkeld .. ..	Part of Dunkeld and Dowally.
355b	Foss .. ..	Parts of Blair-Athol and Dull.
361	Killin .. ..	Parts of Kenmore and Killin.
375	Logiealmond .. ..	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle .. ..	Meigle, and part of Coupar-Angus.
386b	Persie .. ..	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth .. ..	Perth, and part of Kinnoull.
393b	Stanley .. ..	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan .. ..	Part of Killin.
394c	Tenantry .. ..	Parts of Blair-Athol and Moulin.
<b>14. Fife.</b>		
402	Anstruther-Easter ..	Anstruther-Easter, and part of Kilrenny.
417	Crail .. ..	Part of Crail and May Island.
423	Dunbog .. ..	Dunbog, and part of Flisk.
425	Dunino .. ..	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall	Part of Kirkcaldy and Dysart.
457b	Thornton .. ..	Part of Kirkcaldy and Dysart and of Markinch.
<b>17. Stirling.</b>		
473	Bonnybridge .. ..	Parts of Denny, Dunipace, and Falkirk.
483	St Ninians .. ..	Parts of St Ninians and Stirling.
490	Stirling .. ..	Parts of St Ninians and Stirling.

CONSTITUTION OF THE DISTRICTS—*continued.*

No.	Districts.	Component Parts (Parishes).
<b>18. Dumbarton.</b>		
496	Dumbarton .. ..	Dumbarton, and parts of Cardross and Old Kilpatrick.
<b>19. Argyll.</b>		
504	Ardochattan .. ..	Part of Ardochattan and Muckairn.
505	Ardnamurchan .. ..	(1) Parts of Ardnamurchan, and of Arisaig and Moidart.
506	Ballachullish, etc. ..	Parts of Kilmallie and Ardgour.
509	Cumlodden and Minard ..	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc. .. ..	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie .. ..	Parts of Kilmallie and Ardgour.
525	Lismore .. ..	Lismore and Appin, and part of Ardgour.
526	Lochgillhead .. ..	Parts of Glassary and South Knapdale.
529	Muckairn .. ..	Parts of Ardochattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert .. ..	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny .. ..	Part of Kilarrow and Kilmeny.
545	Kinlochspelve .. ..	Part of Pennygown and Torosay.
547	Portnahaven .. ..	Part of Kilchoman.
548	Salen .. ..	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory .. ..	Part of Kilninian and Kilmore.
550	Torosay .. ..	Part of Pennygown and Torosay.
<b>20. Bute.</b>		
556	Lochranza .. ..	Parts of Kilbride and Kilmory.
<b>21. Renfrew.</b>		
559b	Bridge of Weir .. ..	Part of Houston and Killellan and of Kilbarchan.
572	Neillston .. ..	(1) Part of Neillston; (2) Remainder of Neillston and part of Paisley.
<b>22. Ayr.</b>		
576	Ardrossan .. ..	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
578(3)	Ayr (Alloway) .. ..	Parts of Ayr and Maybole.
584b	Crosshill .. ..	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine .. ..	Irvine, and part of Dundonald.
603	Loudoun (Darvel) .. ..	Parts of Loudoun and Galston.
610b	Patna .. ..	Parts of Dalmellington, Dalrymple, Kirkmichael, and Straiton.
<b>23. Lanark.</b>		
622	Barony .. ..	Part of Glasgow.
626a	Cadder (Eastern district) ..	Parts of Cadder and Glasgow.
626b	Calderhead .. ..	Parts of Cambusnethan and Shotts.
644	Glasgow .. ..	Parts of Glasgow, Govan Combination, and Rutherglen.
<b>25. Edinburgh.</b>		
695b	New Craighall .. ..	Parts of Inveresk and Liberton.
698b	Stobhill .. ..	Parts of Borthwick, Cockpen, and Newbattle.
<b>29. Selkirk.</b>		
774a	Caddonfoot .. ..	Caddonfoot, and part of Innerleithen.
<b>30. Roxburgh.</b>		
787b	Edgerston .. ..	Parts of Jedburgh and Southdean.
<b>31. Dumfries.</b>		
813b	Brydekirk .. ..	Parts of Annan, Cummertrees, and Hoddon.
820	Holywood .. ..	Holywood, and part of Terregles.
853b	Wanlockhead .. ..	Part of Sanquhar.
<b>32. Kirkcudbright.</b>		
857b	Bargrennan .. ..	Parts of Minnigaff and Penninghame.
862	Corsockbridge .. ..	Parts of Balmacellan, Kirkpatrick-Durham, and Parton.
864	Dalbeattie .. ..	Part of Urr.
<b>33. Wigtown.</b>		
899	Stranraer .. ..	Stranraer, and parts of Inch and Leswalt.

# METEOROLOGICAL REPORT

FOR THE MONTHS OF

OCTOBER, NOVEMBER, DECEMBER,

1907.

NOTES ON THE NUMERICAL RETURNS OF SCOTTISH METEOROLOGY  
FOR THE QUARTER ENDING 31st DECEMBER 1907.

By Mr A. WATT, M.A., F.R.S.E., under the Direction of the Council of the Scottish Meteorological Society.

THESE returns are founded on the observations made, morning and evening, at 62 of the Stations of the Scottish Meteorological Society, and have been prepared from the Observers' separate schedules.

From the individual results for each station, the following collective results have been obtained, assuming them to have been equally well observed, and to represent the whole country :—

COLLECTED RETURNS FOR ALL THE ACCEPTED STATIONS OF THE SCOTTISH METEOROLOGICAL SOCIETY, HAVING A MEAN LATITUDE = 56° 33' N. ; MEAN LONGITUDE = 3° 45' W. ; AND MEAN ELEVATION = 279 Feet.

1907.	BARO- METER at 32° F. and Sea- level.	SELF-REGISTERING THERMOMETERS.					HYGROMETER.				RAIN.		Cloud. Scale of 0-10.	Re- corded Sun- shine.

\* Returns for the individual stations having Sunshine Recorders are given on p. 62.

And when these returns are compared with the averages of 1856-1905, during the same months, they show the following characteristics and differences :—

OCTOBER 1907—

Mean Barometric Pressure, 29·611 inches ; less than the average of 1856-1905 by 0·203 inch.

Mean Temperature, 47·4 ; greater by 0·8.

Mean Daily Range of Temperature, 11·5 ; less by 0·6.

Mean Humidity, 89 per cent. ; greater by 2 per cent.

Rain, Number of Days, 23 ; greater by 6 days.

Rain, Depth in Inches, 5·62 ; greater by 1·58 inch.

Wind, Mean Force (on Scale of 0-12), 2·3 ; less by 0·5.

Wind, Direction of : a 5 days' excess of winds from between N.E. and S.E.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 7·0 ; greater by 0·6.

NOVEMBER 1907—

Mean Barometric Pressure, 29·895 inches ; greater than the average of 1856-1905 by 0·061 inch.

Mean Temperature, 41·5 ; greater by 0·6.

Mean Daily Range of Temperature, 11·1 ; greater by 0·7.

Mean Humidity, 87 per cent. ; less by 1 per cent.

Rain, Number of Days, 17 ; being the average.

Rain, Depth in Inches, 3·15 ; less by 0·65 inch.

Wind, Mean Force (on Scale of 0-12), 2·5 ; less by 0·3.

Wind, Direction of : a 1 day's excess of winds from E.

Hours of Sunshine, *v.* p. 62.

Mean Amount of Cloud, 6·3 ; less by 0·2.

## DECEMBER 1907—

Mean Barometric Pressure, 29·628 inches; less than the average of 1856-1905 by 0·152 inch.

• Mean Temperature, 38°·5; greater by 0°·4.

Mean Daily Range of Temperature, 8°·5; less by 1°·0.

Mean Humidity, 87 per cent.; less by 1 per cent.

Rain, Number of Days, 21; greater by 4 days.

Rain, Depth in Inches, 4·67; greater by 0·54 inch.

Wind, Mean Force (on Scale of 0-12), 2·6; less by 0·2.

Wind, Direction of: a 5 days' excess of winds from between E. and S.

Hours of Sunshine, *v. p.* 62.

Mean Amount of Cloud, 7·3; greater by 0·8.

## OCTOBER 1907—

Hence the month of OCTOBER 1907 was characterised by an extremely low mean pressure; a rather high mean temperature, with a rather low mean daily range; a very high mean rainfall; a large excess of easterly winds.

The mean pressure of 29·611 inches was 0·203 inch below the normal, and the lowest mean recorded for October during the last fifty years, except in 1872 and 1903. Conditions were in complete contrast to those of September; there was a practically continuous succession of disturbances, and our area never lay under the influence of a high-pressure system. At Leith the sea-level extremes were 30·115 ins. on 31st and 29·004 ins. on 18th.

The mean temperature was 47°·4, or 0°·8 above the normal, the days being 0°·5 and the nights 1°·1 above their respective averages. As a rule, the temperature excess of the month was well marked. The maximum occurred at most stations between 4th and 6th, Gordon Castle reaching 70°·0 in shade on 5th, and Lairg and Haddington 66°·0 on the same day about this time, and towards the end of the month the weather was unusually warm for the time of year. Lowest temperatures occurred as a rule on 8th, but in West and South on 27th. The lowest shade readings reported were 20°·0 at Lednathie on 8th, 22°·0 at Kingussie on 15th, and 25°·5 at Lairg on 8th.

The mean rainfall was 5·62 inches, or 39 per cent. above the normal. The distribution was very irregular. Thus, towards the North West and North there was a decided deficiency, considerable areas having less than half the normal. On the other hand, in North East, East and South there was a pronounced excess, which appears to have been relatively greatest in the Lothians, where several stations had as much as thrice the normal October rainfall. The aggregate of 7·90 inches at Edinburgh was an inch above any October rainfall for at least 100 years, the closest approach being October 1864 with 6·90 inches. In South and South West, however, the month was less wet than October 1903. On 15th a wet period of ten days culminated in a great rainstorm in Eastern and Southern districts. Blackford Hill Observatory, Edinburgh, registered 3·13 inches in 24 hours, Corstorphine 2·95 inches, and Glasgow 2·45 inches. On that day, North Western districts were visited by only slight falls. Over a large part of the country the weather was almost continuously wet from 5th to 24th, with very heavy falls in various districts on 6th, 7th, 8th, 13th, 15th and 17th.

Early in the month touches of wintry weather were experienced, whilst the heavy rains of 15th were accompanied by a severe thunderstorm in East and South East.

Wind of gale force was reported on the East coast on 17th, and on the West on 18th and 19th.

Coast fog occurred at times in East and North.

Sunshine was decidedly deficient.

Auroras noted at Baltasound on 8th, 9th, 14th, 15th and 27th, and rather widely on one or more of these days.

## NOVEMBER 1907—

Hence the month of NOVEMBER 1907 was characterised by a rather high mean pressure; a slightly high mean temperature, with a slightly high mean daily range; a rather low mean rainfall; and a nearly average distribution of winds.

The mean pressure of 29·895 inches was 0·061 inch above the normal, and nearly three-tenths of an inch above the mean for October. Pressure was high during the first three weeks, except on 12th and 13th, but from 26th to 28th conditions were very unsettled. At Leith the sea-level extremes were 30·484 inches on 30th, and 28·948 inches on 26th.

The mean temperature was 41°·5, or 0°·6 above the normal, the days being 0°·9 and the nights 0°·2 above their respective averages. Some inland and Western stations showed a temperature deficiency, whilst towards the South East there was a fairly well-marked excess. The first half of the month was decidedly mild, with highest temperatures in most districts on 4th, when the highest shade readings reported were 59°·7 at Leith, 59°·6 at Glasgow, and 59°·0 at Helensburgh. Thereafter conditions were more variable, with short spells of rather severe frost around 18th and 26th. The lowest shade readings reported were 15° at Balmoral on 26th; 18° at Kingussie on the same day; and 20° at Stronvar on 19th. At Balmoral the night temperatures fell below 30° on grass on 23 nights, at Crathes on 22 nights.

The mean rainfall was 3·15 inches, or 17 per cent. below the normal. In Eastern districts there was a decided shortage, and Midlothian had only half its average rainfall. In the West a less well-marked deficiency prevailed, and a few stations reported a slight excess. Most districts had a very heavy fall on at least one day of the month, but the Edinburgh area was in this respect exceptional, Leith not having as much as a quarter of an inch on any one day. Perhaps the heaviest general fall occurred on 26th, on which day some places, such as Dundee and Perth, registered more than half their totals for the entire month. Between 10th and 12th, on 16th and on 22nd, very heavy falls occurred in various districts. Lochbuie (Mull) had amounts of 1 inch or over on as many as 5 days; Glenquoich on 4 days; Bendamph, Fort William, and Stronvar on 2 days. The heaviest falls reported were 2½ inches at Glenquoich on 13th; 1·80 inches at Bendamph (Loch Torridon) on 21st; and 1·78 inches at Baltasound (Shetland) on 22nd. In Eastern districts the well-defined shortage was in striking contrast to the heavy rains of October.

Though fine spells occurred, the general conditions of the month may be described as of a very changeable character. On the afternoon of the 12th a rapidly travelling storm-centre affected Western districts especially. On 21st and 22nd a S.W. gale was experienced in all districts, and on 26th a gale from S.E. was of considerable severity.

Wintry conditions prevailed around 18th and 26th, with snow and sleet in many districts.

Thunderstorms occurred in Shetland on 8th; on 12th at Lairg, and over a large part of Western Scotland; at Leadhills on 13th and 14th.

Auroras noted at Baltasound on 3rd, 5th, 6th, 7th, 11th, 13th, and 29th; at Fort Augustus on 5th and 10th.

Sunshine records in general differed little from the normal, but there was a considerable excess towards N.W.

But little coast fog was experienced except in the Firth of Forth. On 26th, however, rather dense land fog prevailed, and the Upper Clyde was affected.

#### DECEMBER 1907—

Hence the month of DECEMBER 1907 was characterised by a low mean pressure; a slightly high mean temperature, with a rather low mean daily range; a rather high mean rainfall; and a large excess of South Easterly winds.

The mean pressure was 29·628 inches, or 0·152 inch below the normal. Considerable fluctuations occurred during the first two weeks, but from very low readings on 13th there was a rapid recovery, with high readings during the rest of the month except from 20th to 22nd. At Leith the sea-level extremes were 30·339 inches on 24th and 28·631 inches on 13th.

The mean temperature was 38°·5, or 0°·4 above the normal. Many stations had practically their average temperatures, whilst some showed a deficiency. As regards the whole country, the nights were 0°·9 above the average, and the days practically normal. In several districts the 1st was the coldest day, and, speaking very generally, it may be said that the first week of the month was cold, the second mild, and the third very mild, though at a few stations in the West lowest temperatures were reported on the night of 14th. Highest temperatures as a rule occurred on 17th. During the last week or ten days conditions were controlled by winds from some Easterly point, and cold weather was experienced. The shade temperatures ranged from 54°·2 at Fort William on 17th to 10° at Balmoral on 30th.

The mean rainfall was 4·67 inches, or 13 per cent. above the normal. In most districts to the East and South of the Grampians there was a well-defined excess, amounting to 70 per cent. at Edinburgh, and most pronounced along a belt stretching from the Forth to the Clyde. Towards North and North West there was as a rule a shortage, though some stations had a slight excess. In several Western and Southern districts rain fell on every day from 1st to 22nd, whilst towards North and East there were occasional fine days. Between 4th and 11th we note falls exceeding 1 inch in 24 hours at Glencarron on 4th and 10th; at Glenquoich on 5th, 10th and 11th; at Fort William on 9th and 10th; at Lochbuie on 4th, 7th and 9th; at Rothesay on 10th; the greatest of these falls being 2·10 inches at Glenquoich on 11th. On 13th a severe rainstorm was general in Eastern districts, 1·40 inches being registered at Logie Coldstone, and about 1·20 inches at Edinburgh and West Linton. On 20th heavy falls were again widespread, with 1 inch at Paisley, Cally and Dumfries. The last 8 days were rainless or all but so in many districts.

The heavy rains of the 13th were the accompaniment of a gale from W. and N.W., whilst on 26th a severe gale from S.E. occurred. During the last week of the month weather of a wintry type prevailed, with snow on several days, but in most districts to no great depth.

Thunderstorms reported at Kyleakin and Corran on 4th; Cargen on 6th; Cally on 7th; and Colmonell on 9th. Lightning in several districts on 4th, 5th or 6th.

At the stations with sunshine recorders the amounts did not differ greatly from the normal except at Inverness, which had twice the average.

Land fog, occasionally very dense, was frequent towards the end of the month.

Auroras observed in Shetland on 7th, 13th, 28th; at Inverness on 10th; at Deerness and Balmoral on 11th.

## REGISTRARS' NOTES.

---

IN compliance with the following Instructions, many of the Registrars have appended remarks to their Returns, from which the subjoined Notes have been selected. The Registrars alone must be considered responsible for the opinions which they express.

---

### INSTRUCTIONS TO REGISTRARS.

"If, at any time, the Births (whether legitimate or illegitimate), the Deaths, or the Marriages registered during the Quarter have been above or below the average, here state what you consider to be the cause, and whether epidemics, such as Measles, Typhus, Cholera, etc., have prevailed in the District; or if there is any other fact in the character of the Weather, Sanitary or Social Arrangements, Movement of the Population, etc., which will account for the circumstance."

---

*The Figures refer to the Numbers of the Districts in the preceding Tables.*

---

#### I. NORTHERN DIVISION.

##### 1. Shetland.

3 (1). DUNROSSNESS.—One of the deaths in November was that of a man aged 97 years.

##### 2. Orkney.

19. HOLM.—Five of the deaths registered in October were those of four men and a woman belonging to the neighbouring island of Barray, who were drowned by the capsizing of a boat.

33 (1). WESTRAY. — Deaths unprecedentedly few over the whole year.

## 3. Caithness.

41. THURSO.—Hooping-cough very prevalent here at present, but only one death therefrom so far.

## 4. Sutherland.

45. CLYNE.—Hooping-cough of a mild type prevalent during December. Of the deaths registered in December, one was that of a nonagenarian.

52. KILDONAN.—One of the deaths registered was that of a female aged 103 years. She never required the services of a physician, and retained all her faculties unimpaired almost to the end.

## II. NORTH-WESTERN DIVISION.

## 5. Ross and Cromarty.

*Mainland.*

75 (1). LOCHBROOM.—The marriages have been rapidly on the decline for many years past in this parish and district. During this past year not one was either registered or proclaimed. The births are also steadily on the decline.

83. TARBAT.—The quarter just closed shows the lowest record of registration in this parish since compulsory registration came into force. This is chiefly attributable to depopulation.

## 6. Inverness.

*Mainland.*

91a. ARDERSIER.—Of the five deaths, one was caused by drowning. Another was that of a male aged over 100 years.

92a (1). BOLESKINE.—Four of the deaths registered were of children under three years of age; hooping cough and measles in the district.

92b. CANNICH.—Of the two deaths in October, one was the result of a motor car accident. Both the deceased were only temporarily residing in the district.

104. LAGGAN.—Measles prevalent during the quarter, but no deaths therefrom.

## III. NORTH-EASTERN DIVISION.

## 8. Elgin.

139. KNOCKANDO.—There were several cases of scarlet fever in the village of Archiestown, but no deaths resulted.

141. ROTHES.—The number of deaths (24) registered during the year 1907 is the smallest yet recorded.

## 9. Banff.

148. BOTRIPHNIE.—This past quarter's registrations have been the lowest for years. The birth-rate tends to fall off.

167. SEAFIELD.—Of the ten deaths registered in December, four were those of infants.

## 10. Aberdeen.

182. COULL.—The three persons whose deaths were registered during the year were aged 77, 80, and 90 years respectively.

211. KINELLAR.—No epidemic has appeared for many years in the district. Of the three deaths registered during the year, two were of persons well advanced in years, while the third was a case of suicide.

222a. MIDMAR.—One of the deaths recorded is that of a female aged 100 years.

222b. MILLBEX.—Of the two deaths registered during the quarter, one was that of a female who was in her 92nd year.

224. MONYMSK.—For the first time since 1855, the deaths registered during the year outnumber the births.

225. NEW DEER.—One-third of the deaths registered were of persons belonging to other parishes who died in the Combination Poor-house.

231 (2). WEST PETERCULTER.—Of the three deaths registered during the past quarter, the respective ages were 9 days, 9 weeks, and 76 years. This gives a total of four deaths during the past six months in this district, the population of which must now exceed 3000.

## 11. Kincardine.

251 (2). PORTLETHEN.—No marriages have been recorded during the year, an event quite unprecedented. There were eleven proclamations, but the marriages were all celebrated in Aberdeen.

265. MARYKIRK.—Of the two deaths registered in December, one was caused by diphtheria, while the other was a case of drowning.

## IV. EAST-MIDLAND DIVISION.

## 12. Forfar.

282 (4). ST ANDREW.—Death-rate in December abnormally high, owing to an epidemic of measles.

## 13. Perth.

330. AUCHTERGAVEN.—Of the nine deaths registered during the year, six were of persons aged 70 years and upwards.

334. BLAIR ATHOLL.—Hooping-cough at present prevalent, but of a very mild type.

339. CLUNIE.—Of the eleven deaths registered during the year, seven were due to heart disease.

364. KINCARDINE.—The death registered in December is the only one recorded during the past five months.

375. LOGIEALMOND.—Measles prevalent in the district, but of a very mild type. The schools have been closed.

377. LONGFORGAN.—Of the six persons whose deaths were registered, one was aged 81 years and two over 70 years.

385. MUCKHART.—A great deal of illness, including an epidemic of scarlet fever, has prevailed during the past quarter. Both deaths, however, resulted from consumption.

387. PERTH (Burghal).—The high death-rate for the quarter is chiefly due to deaths among the aged and children.

387. PERTH (Landward).—The two deaths occurred in the City Isolation Hospital.

393b. STANLEY.—The number of deaths (23) registered in 1907 is equal to the totals for 1905 and 1906 combined. The latter, however, were under the average. Of these deaths, the aggregate ages of eleven were 882 years, while seven were those of infants. Of the remaining five deaths, one was the result of a railway fatality, and another was that of a vagrant.

## 14. Fife.

417. CRAIL.—Of the eight deaths, five were of persons aged 69 and upwards, and two of infants.

440. KINGLASSIE.—Measles very prevalent in November, the public schools being closed for four weeks.

455. SALINE.—The only death registered during the quarter was that of a female child who had lived only ten minutes.

458b. TULLIALLAN.—Of the twelve deaths registered, seven were of persons aged 67 years and upwards.

## 16. Clackmannan.

467. DOLLAR.—Of the nine deaths registered, three were of persons aged from 84 to 89 years.

## V. WEST-MIDLAND DIVISION.

## 19. Argyll.

*Mainland.*

510 (2). KILMUN.—The two deaths registered in December were of persons aged 88 and 91 years respectively.

515. KILBRANDON AND KILCHATTAN.—There has been an outbreak of measles and also of scarlet fever during the year, but no deaths resulted.

523. KILMORE AND KILBRIDE.—The death-rate has been increased by an epidemic of measles in December.

525 (4). DUROR.—One of the two deaths registered was the result of accidental drowning.

526. LOCHGILPHEAD.—Of the 84 deaths registered during the year, 29 were of inmates of the Argyll and Bute District Asylum.

*Insular.*

544 (2).—KILNINIAN AND KILMORE.—Seven of the eight deaths registered during the year were of persons aged over 80 years.

## 20. Bute.

553 (2). KILBRIDE.—The three persons whose deaths were registered during the quarter were aged 63, 72, and 76 years respectively.

557. NORTH BUTE.—Of the nine deaths registered during the quarter, two were due to violent causes, while of the remaining seven, six were of persons aged over 70 years.

558. ROTHESAY.—For several months measles has been very prevalent. Several deaths have resulted, principally of young people, but grown-up persons have also been attacked, one fatally.

## VI. SOUTH-WESTERN DIVISION.

## 22. Ayr.

578 (3). ALLOWAY.—Of the 21 deaths registered during the quarter, 17 were of inmates of Ayr District Asylum.

607. MUIRKIRK.—Both births and marriages for the year show a large decrease as compared with the previous year. This is accounted for by the closing of the Cairntable pits at Glenbuck, with the consequent decline in population.

616. STEWARTON.—No deaths occurred in this parish from 15th October to 6th December, while ten occurred between the latter date and 27th December.

**23. Lanark.**

646 (3). PARTICK.—Measles prevalent during December.

**VII. SOUTH-EASTERN DIVISION.**

**25. Edinburgh.**

677. COLINTON.—Of the 53 deaths registered during the quarter, 42 occurred in Craiglockhart Poorhouse.

680. CRANSTOUN. — The death recorded in December was that of a man residing in Dalkeith, who died on the roadside in this parish of (supposed) heart failure.

686. FALA AND SOUTRA.—The only death registered was that of a child who had lived only a few hours.

**26. Haddington.**

717. PRESTONKIRK. — Of the 14 deaths registered, five occurred in the Combination Poorhouse.

**27. Berwick.**

730. CHIRNSIDE. — Scarlet fever prevalent. Public school closed.

732 (1). COLDINGHAM. — Of the 17 deaths in December, 15 were those of the captain and crew of the s.s. "Alfred Erlandsen," which was wrecked on Ebb Car Rocks.

733. COLDSTREAM.—During the past year the number of deaths has exceeded the number of births. This is the third time that this has happened since 1855.

742. GORDON.—The only death registered was that of a child three days old.

747. LANGTON.—During the quarter diphtheria appeared among five families.

**28. Peebles.**

767. NEWLANDS. — The deaths registered include that of the oldest inhabitant, who was 91 years of age.

**VIII. SOUTHERN DIVISION.**

**30. Roxburgh.**

786. CRAILING.—The birth-rate for the past year is the lowest on record.

788. EDNAM.—For the first time since the passing of the Registration Act no marriages have been registered during the past year.

799 (1). MELROSE.—Of the 22 deaths, five occurred in the District Asylum.

**31. Dumfries.**

830. HOLYWOOD.—It is remarkable that only three deaths were recorded this year (1907)—one of them that of an old woman belonging to Dumfries, who was killed on the railway—as compared with an annual average of 17 for the last 20 years.

837 (2). KIRKPATRICK - FLEMING (Southern District).—Four of the six deaths which took place in the poorhouse were those of persons belonging to other parishes.

**32. Kirkcudbright.**

874. KIRKPATRICK - DURHAM. — Only seven deaths have been registered during 1907—the lowest number on record.

877. NEW ABBEY.—Two of the three illegitimate children whose births were registered in December were twins.

\* The actual number of Districts is 1078—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 13 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.
